

## Contents

### Editorial

- 1 **2013 Reviews of *Global Change Biology***  
Stephen P. Long and Rachel Shekar

### Reviews

- 3 **Livestock greenhouse gas emissions and mitigation potential in Europe**  
Jessica Bellarby, Reyes Tirado, Adrian Leip, Franz Weiss, Jan Peter Lesschen and Pete Smith
- 19 **Methane emissions from rice paddies natural wetlands, lakes in China: synthesis new estimate**  
Huai Chen, Qiu'an Zhu, Changhui Peng, Ning Wu, Yanfen Wang, Xiuqin Fang, Hong Jiang, Wenhua Xiang, Jie Chang, Xiangwen Deng and Guirui Yu
- 33 **Climate, duration, and N placement determine N<sub>2</sub>O emissions in reduced tillage systems: a meta-analysis**  
Chris van Kessel, Rodney Venterea, Johan Six, Maria Arlene Adviento-Borbe, Bruce Linquist and Kees Jan van Groenigen
- 45 **Plant respiration and photosynthesis in global-scale models: incorporating acclimation to temperature and CO<sub>2</sub>**  
Nicholas G. Smith and Jeffrey S. Dukes
- 64 **Variable temperature effects of Open Top Chambers at polar and alpine sites explained by irradiance and snow depth**  
Stef Bokhorst, Ad Huiskes, Rien Aerts, Peter Convey, Elisabeth J. Cooper, Linda Dalen, Brigitta Erschbamer, Jón Gudmundsson, Annika Hofgaard, Robert D. Hollister, Jill Johnstone, Ingibjörg S. Jónsdóttir, Marc Lebouvier, Bart van de Vijver, Carl-Henrik Wahren and Ellen Dorrepaal
- 75 **A plant's perspective of extremes: terrestrial plant responses to changing climatic variability**  
Christopher P. O. Reyer, Sebastian Leuzinger, Anja Rammig, Annett Wolf, Ruud P. Bartholomeus, Antonello Bonfante, Francesca de Lorenzi, Marie Dury, Philipp Gloning, Renée Abou Jaoudé, Tamir Klein, Thomas M. Kuster, Monica Martins, Georg Niedrist, Maria Riccardi, Georg Wohlfahrt, Paolo de Angelis, Giovambattista de Dato, Louis François, Annette Menzel and Marizia Pereira
- 90 **How interactions between microbial resource demands, soil organic matter stoichiometry, and substrate reactivity determine the direction and magnitude of soil respiratory responses to warming**  
Sharon A. Billings and Ford Ballantyne IV
- 103 **Climate change and ocean acidification effects on seagrasses and marine macroalgae**  
Marguerite Koch, George Bowes, Cliff Ross and Xing-Hai Zhang

### Letter

- 133 **Comments on "A test of a field-based <sup>15</sup>N-nitrous oxide pool dilution technique to measure gross N<sub>2</sub>O production in soil" by Yang *et al.* (2011), *Global Change Biology*, 17, 3577–3588**  
Reinhard Well and Klaus Butterbach-Bahl

### Primary Research Articles

- 136 **Satellite data identify decadal trends in the quality of *Pygoscelis* penguin chick-rearing habitat**  
Megan A. Cimino, William R. Fraser, Andrew J. Irwin and Matthew J. Oliver

# Contents (*continued*)

- 149 **Climate change, phenology, and habitat degradation: drivers of gosling body condition and juvenile survival in lesser snow geese**  
Lise M. Aubry, Robert F. Rockwell, Evan G. Cooch, Rodney W. Brook, Christa P. H. Mulder and David N. Koons
- 161 **Global change effects on *Bromus tectorum* L. (Poaceae) at its high-elevation range margin**  
Amy L. Concilio, Michael E. Loik and Jayne Belnap
- 173 **Introduced annual grass increases regional fire activity across the arid western USA (1980–2009)**  
Jennifer K. Balch, Bethany A. Bradley, Carla M. D'Antonio and José Gómez-Dans
- 184 **Improving our understanding of environmental controls on the distribution of C<sub>3</sub> and C<sub>4</sub> grasses**  
Stephanie Pau, Erika J. Edwards and Christopher J. Still
- 197 **Climate change and the optimal flowering time of annual plants in seasonal environments**  
Jacob Johansson, Kjell Bolmgren and Niclas Jonzén
- 208 **Nitrogen to phosphorus ratios of tree species in response to elevated carbon dioxide and nitrogen addition in subtropical forests**  
Juxiu Liu, Wenjuan Huang, Guoyi Zhou, Deqiang Zhang, Shizhong Liu and Yiyong Li
- 217 **Tree species diversity interacts with elevated CO<sub>2</sub> to induce a greater root system response**  
Andrew R. Smith, Martin Lukac, Michael Bambrick, Franco Miglietta and Douglas L. Godbold
- 229 **Driving factors of a vegetation shift from Scots pine to pubescent oak in dry Alpine forests**  
Andreas Rigling, Christof Bigler, Britta Eilmann, Elisabeth Feldmeyer-Christe, Urs Gimmi, Christian Ginzler, Ulrich Graf, Philipp Mayer, Giorgio Vacchiano, Pascale Weber, Thomas Wohlgemuth, Roman Zweifel and Matthias Dobbertin
- 241 **The climate velocity of the contiguous United States during the 20th century**  
Solomon Z. Dobrowski, John Abatzoglou, Alan K. Swanson, Jonathan A. Greenberg, Alison R. Mynsberge, Zachary A. Holden and Michael K. Schwartz
- 252 **Does declining carbon-use efficiency explain thermal acclimation of soil respiration with warming?**  
Colin L. Tucker, Jennifer Bell, Elise Pendall and Kiona Ogle
- 264 **Uncertainty in soil carbon accounting due to unrecognized soil erosion**  
Jonathan Sanderman and Adrian Chappell
- 273 **Can a thermally tolerant symbiont improve the future of Caribbean coral reefs?**  
Juan Carlos Ortiz, Manuel González-Rivero and Peter J. Mumby
- 282 **Sensitivity of coral calcification to ocean acidification: a meta-analysis**  
Neil C. S. Chan and Sean R. Connolly
- 291 **Decline in growth of foraminifer *Marginopora rossi* under eutrophication and ocean acidification scenarios**  
Claire E. Reymond, Alicia Lloyd, David I. Kline, Sophie G. Dove and John M. Pandolfi
- 303 **Ocean acidification reduces induction of coral settlement by crustose coralline algae**  
Nicole S. Webster, Sven Uthicke, Emanuelle S. Botté, Florita Flores and Andrew P. Negri
- 316 **Glacier melting and stoichiometric implications for lake community structure: zooplankton species distributions across a natural light gradient**  
Cecilia Laspoumaderes, Beatriz Modenutti, María Sol Souza, Marcela Bastidas Navarro, Florencia Cuassolo and Esteban Balseiro
- Technical Advance**
- 327 **Evaluation of photoacoustic infrared spectroscopy for simultaneous measurement of N<sub>2</sub>O and CO<sub>2</sub> gas concentrations and fluxes at the soil surface**  
Javed Iqbal, Michael J. Castellano and Timothy B. Parkin
