

Original articles

- 1–9 **In vitro rumen fermentation and methane production are influenced by active components of essential oils combined with fumarate**
B. Lin; J. H. Wang; Y. Lu; Q. Liang; J. X. Liu
- 10–19 **Replacement of fish meal protein by surimi by-product protein in the diet of blue gourami *Trichogaster trichopterus* fingerlings**
K. N. Mohanta; S. Subramanian; V. S. Korikanthimath
- 20–26 **Ontogeny of the stomach in yellow catfish (*Pelteobagrus fulvidraco*): detection and quantification of pepsinogen and H⁺/K⁺-ATPase gene expression**
C. Gao; R. B. Yang; W. B. Hu; J. Wang
- 27–38 **Egg yolk fatty acid profile of avian species – influence on human nutrition**
S. H. Golzar Adabi; M. Ahbab; A. R. Fani; A. Hajbabaie; N. Ceylan; R. G. Cooper
- 39–47 **Effects of high electrolyte contents in the diet and using floor heating on development and severity of foot pad dermatitis in young turkeys**
A. Abd El-Wahab; C. F. Visscher; A. Beineke; M. Beyerbach; J. Kamphues
- 48–57 **Effect of the administration of young leaves of *Quercus pyrenaica* on rumen fermentation in relation to oak tannin toxicosis in cattle**
R. R. Doce; A. Belenguer; P. G. Toral; G. Hervás; P. Frutos
- 58–66 **Influence of high-altitude grazing on bone metabolism of growing sheep**
A. Liesegang; D. Hüttenmoser; J. Risteli; F. Leiber; M. Kreuzer; M. Wanner
- 67–71 **Influence of light colours on growth and stress response of rainbow trout (*Oncorhynchus mykiss*) under laboratory conditions**
M. S. Heydarnejad; M. Parto; A. A. Pilevarian
- 72–79 **Effect of dental correction on voluntary hay intake, apparent digestibility of feed and faecal particle size in horse**
S. Zwirgmaier; H.-P. Remler; E. Senckenberg; J. Fritz; P. Stelzer; E. Kienzle
- 80–90 **Feed consumption, diet digestibility and mineral utilization in captive blackbuck (*Antelope cervicapra*) fed different levels of concentrates**
A. Das; S. Katole; M. Choubey; S. P. Gupta; M. Saini; V. Kumar; D. Swarup
- 91–96 **Effects of forage type, body condition and single-nucleotide polymorphisms in the bovine cytochrome P450 regulatory region on cow productivity**
M. A. Sales; K. Y. Murphy; S. T. Reiter; A. H. Brown Jr; M. A. Brown; M. L. Looper; C. F. Rosenkrans Jr
- 97–108 **Influences of incorporating detoxified *Jatropha curcas* kernel meal in common carp (*Cyprinus carpio* L.) diet on the expression of growth hormone- and insulin-like growth factor-1-encoding genes**
V. Kumar; W. K. B. Khalil; U. Weiler; K. Becker
- 109–118 **Effects of the ruminal comminution rate and microbial contamination of particles on accuracy of in situ estimates of ruminal degradability and intestinal digestibility of feedstuffs**
J. M. Arroyo; J. González
- 119–125 **Non-targeted analyses of animal plasma: betaine and choline represent the nutritional and metabolic status**
K. Katayama; T. Sato; T. Arai; H. Amao; Y. Ohta; T. Ozawa; P. R. Kenyon; R. E. Hickson; H. Tazaki
- 126–136 **Effect of dietary protein and lipid levels on growth, nutrient utilization and whole-body composition of blue gourami, *Trichogaster trichopterus* fingerlings**
K. N. Mohanta; S. Subramanian; V. S. Korikanthimath
- 137–145 **Diets enriched with a Jerte Valley cherry-based nutraceutical product reinforce nocturnal behaviour in young and old animals of nocturnal (*Rattus norvegicus*) and diurnal (*Streptopelia risoria*) chronotypes**
J. Delgado; M^a. P. Terrón; M. Garrido; J. A. Pariente; C. Barriga; A. B. Rodriguez; S. D. Paredes
- 146–154 **Animal fibre: The forgotten nutrient in strict carnivores? First insights in the cheetah**
S. Depauw; M. Hesta; K. Whitehouse-Tedd; L. Vanhaecke; A. Verbrugghe; G. P. J. Janssens
- 155–161 **The levels of zearalenone and its metabolites in plasma, urine and faeces of horses fed with naturally, *Fusarium* toxin-contaminated oats**
P. Songsermsakul; J. Böhm; C. Aurich; J. Zentek; E. Razzazi-Fazeli
- 162–169 **Effects of caponization on fat metabolism-related biochemical characteristics of broilers**
G. K. Symeon; M. Charismiadou; F. Mantis; I. Bizelis; A. Kominakis; E. Rogdakis
- 170–180 **Amending reduced fish-meal feeds with marine lecithin, but not soy lecithin, improves the growth of juvenile cobia and may attenuate heightened responses to stress challenge**
J. Trushenski; M. Schwarz; W. V. N. Pessoa; B. Mulligan; C. Crouse; B. Gause; F. Yamamoto; B. Delbos
- 181–189 **Oral and intravenous L-[1-¹³C]phenylalanine delivery measure similar rates of elimination when gastric emptying and splanchnic extraction are accounted for in adult mixed hounds¹⁻⁴**
M. A. Gooding; J. P. Cant; P. B. Pencharz; G. M. Davenport; J. L. Atkinson; A. K. Shoveller
- 190–196 **Energy requirements of puppies of two different breeds for ideal growth from weaning to 28 weeks of age**
B. Dobenecker; V. Endres; E. Kienzle
- 197–204 **Protein intake but not feed intake affects dietary energy for finishing pigs**
S. Moehn; C. L. Levesque; R. O. Ball
- 205 **Withdrawn: Effects of OmniGen-AF on blood neutrophil gene expression, milk leucocyte populations and production performance of early lactating dairy cows**
R. D. Schramm; S. L. Shields; P. Rezamand; K. S. Seo; M. A. McGuire
