

CONTENTS

Articles

- 1 Whole-genome association study for energy balance and fat/protein ratio in German Holstein bull dams
J Tetens, T Seidenspinner, N Buttchereit, G Thaller
- 9 Interaction of *MC1R* and *PMEL* alleles on solid coat colors in Highland cattle
S M Schmutz, D L Dreger
- 14 A two-step approach to map quantitative trait loci for meat quality in connected porcine F₂ crosses considering main and epistatic effects
P Stratz, C Baes, C Rückert, S Preuss, J Bennewitz
- 24 Systematic identification and characterization of porcine snoRNAs: structural, functional and developmental insights
N Liu, B Xiao, H-Y Ren, Z-L Tang, K Li
- 34 Genome-wide association studies for hematological traits in swine
J Y Wang, Y R Luo, W X Fu, X Lu, J P Zhou, X D Ding, J F Liu, Q Zhang
- 44 Genome-wide association study of insect bite hypersensitivity in Dutch Shetland pony mares
A Schurink, B J Ducro, J W M Bastiaansen, K Frankena, J A M van Arendonk
- 53 Autosomal genetic diversity in non-breed horses from eastern Eurasia provides insights into historical population movements
V Warmuth, A Manica, A Eriksson, G Barker, M Bower
- 62 Quantitative trait loci segregating in crosses between New Hampshire and White Leghorn chicken lines: III. Fat deposition and intramuscular fat content
M K Nassar, Z S Goraga, G A Brockmann
- 69 Detecting population structure and recent demographic history in endangered livestock breeds: the case of the Italian autochthonous donkeys
L Colli, G Perrotta, R Negrini, L Bomba, D Bigi, P Zambonelli, A V Supplizi, L Liotta, P Ajmone-Marsan
- 79 Molecular phylogeography and genetic diversity of East Asian goats
B Z Lin, S Odahara, M Ishida, T Kato, S Sasazaki, K Nozawa, H Mannen

Short Communications

- 86 Inferring the recent ancestry of *myostatin* alleles affecting muscle mass in cattle
B A O'Rourke, P L Greenwood, P F Arthur, M E Goddard
- 91 The IGF1 pathway genes and their association with age of puberty in cattle
M R S Fortes, Y Li, E Collis, Y Zhang, R J Hawken
- 96 Nucleotide variability and haplotype heterogeneity at the porcine *fat mass and obesity-associated (FTO)* gene
L Fontanesi, V Russo
- 101 Effects of polymorphisms in the porcine microRNA *MIR206/MIR133B* cluster on muscle fiber and meat quality traits
J-S Lee, J-M Kim, K-S Lim, J-S Hong, K-C Hong, Y S Lee
- 107 Mapping rainbow trout immune genes involved in inflammation reveals conserved blocks of immune genes in teleosts
R B Phillips, A B Ventura, J J DeKoning, K M Nichols
- 114 Characterization of different 5'-untranslated exons of the *ASIP* gene in black-and-tan Doberman Pinscher and brindle Boxer dogs
R Ciampolini, F Cecchi, A Spaterna, A Bramante, S M Bardet, A Oulmouden

Brief Notes

- 118 Association of bovine fatty acid composition with novel missense nucleotide polymorphism in the *thyroid hormone-responsive (THRSP) gene*
B La, D Oh, Y Lee, S Shin, C Lee, E Chung, J Yeo
- 118 Polydactyly mutation is linked with chromosome 2p region in Beijing fatty chicken
K Yang, Y Chen, C Gu, Z Zhou, C He, L Tang, S Li, L Zhao, H Meng, Q Huang
