Articles

- The effects of crude protein concentration and slow release urea on nitrogen metabolism in Holstein steers
Vaughn B. Holder, Samer W. El-Kadi, Juan M. Tricarico, Eric S. Vanzant, Kyle R. McLeod and David L. Harmon 93
- Microbial biomass in faeces of dairy cows affected by a nitrogen deficient diet
Daphne Isabel Jost, Martina Aschemann, Peter Lebzien, Rainer Georg Joergensen and Albert Sundrum 104
- Transfer of conjugated linoleic acids into different tissues of dairy cows
Dirk von Soosten, Ronny Kramer, Gerhard Jahreis, Ulrich Meyer, Gerhard Flachowsky and Sven Dänicke 119
- Intestinal transport of deoxynivalenol across porcine small intestines
Amal Halawa, Sven Dänicke, Susanne Kersten and Gerhard Breves 134
- Effect of different fat sources in parental diets on growth performance, villus morphology, digestive enzymes and colorectal microbiota in pigeon squabs
Peng Xie, Youming Wang, Chao Wang, Chao Yuan and Xiaoting Zou 147
- Research Note**
- Method for the preparation of mucosal flaps from the jejunum of laying hens for transporter studies in Ussing chambers
Isabelle Ruhnke, Ilen Röhe, Wilfried Meyer, Susan Kröger, Konrad Neumann and Jürgen Zentek 161
