

Practitioner's Perspective

- 281 New Zealand Species Recovery Groups and their role in evidence-based conservation
J. G. Ewen, L. Adams and R. Renwick

Human-wildlife interactions

- 286 Functional responses, seasonal variation and thresholds in behavioural responses of moose to road density
H. L. Beyer, R. Ung, D. L. Murray and M.-J. Forfin
- 295 Relative influence of human harvest, carnivores, and weather on adult female elk survival across western North America
J. Brodie, H. Johnson, M. Mitchell, P. Zager, K. Proffitt, M. Hebblewhite, M. Kauffman, B. Johnson, J. Bissonette, C. Bishop, J. Gude, J. Herbert, K. Hersey, M. Hurley, P. M. Lukacs, S. McCorquodale, E. McIntire, J. Nowak, H. Sawyer, D. Smith and P. J. White
- 306 Lasting behavioural responses of brown bears to experimental encounters with humans
A. Ordiz, O.-G. Støen, S. Sæbø, V. Sahlén, B. E. Pedersen, J. Kindberg and J. E. Swenson

Ecosystem services

- 315 Sustaining recreational quality of European lakes: minimizing the health risks from algal blooms through phosphorus control
L. Carvalho, C. McDonald, C. de Hoyos, U. Mischke, G. Phillips, G. Borics, S. Poikane, B. Skjelbred, A. L. Solheim, J. Van Wichelen and A. C. Cardoso
- 324 REVIEW: Evaluating ecosystem goods and services after restoration of marginal upland peatlands in South-West England
E. Grand-Clement, K. Anderson, D. Smith, D. Luscombe, N. Gatis, M. Ross and R. E. Brazier
- 335 Quantifying the impacts of bioenergy crops on pollinating insect abundance and diversity: a field-scale evaluation reveals taxon-specific responses
D. A. Stanley and J. C. Stout
- 345 Flow and stability of natural pest control services depend on complexity and crop rotation at the landscape scale
A. Rusch, R. Bommarco, M. Jonsson, H. G. Smith and B. Ekbom

Agricultural landscapes

- 355 Food production vs. biodiversity: comparing organic and conventional agriculture
D. Gabriel, S. M. Sait, W. E. Kunin and T. G. Benton
- 365 Ecosystem function enhanced by combining four functional types of plant species in intensively managed grassland mixtures: a 3-year continental-scale field experiment
J. A. Finn, L. Kirwan, J. Connolly, M. T. Sebastià, A. Helgadottir, O. H. Baadshaug, G. Bélanger, A. Black, C. Brophy, R. P. Collins, J. Čop, S. Dalmannsdóttir, I. Delgado, A. Elgersma, M. Fothergill, B. E. Frankow-Lindberg, A. Ghesquiere, B. Golinska, P. Golinski, P. Griou, A.-M. Gustavsson, M. Höglind, O. Huguenin-Elie, M. Jørgensen, Z. Kadziulienė, P. Kurki, R. Llurba, T. Lunnan, C. Porqueddu, M. Suter, U. Thumm and A. Lüscher
- 376 Management legacies shape decadal-scale responses of plant diversity to experimental disturbance regimes in fragmented grassy woodlands
S. M. Prober, K. R. Thiele and J. Speijers
- 387 Landscape composition, connectivity and fragment size drive effects of grassland fragmentation on insect communities
V. Rösch, T. Tschernitzke, C. Scherber and P. Batáry

Restoration

- 395 Patterns of contemporary gene flow suggest low functional connectivity of grasslands in a fragmented agricultural landscape
T. Aavik, R. Holderegger, P. J. Edwards and R. Billeter
- 404 Spatial isolation slows down directional plant functional group assembly in restored semi-natural grasslands
K. Helsen, M. Hermy and O. Honnay
- 414 Epiphyte metapopulation persistence after drastic habitat decline and low tree regeneration: time-lags and effects of conservation actions
V. Johansson, T. Ranius and T. Snäll
- 423 Is restoring flora the same as restoring fauna? Lessons learned from koalas and mining rehabilitation
R. H. Cristescu, J. Rhodes, C. Frère and P. B. Banks
- 432 The benefits of habitat restoration for rock-dwelling velvet geckos *Oedura lesueurii*
B. M. Croak, J. K. Webb and R. Shine
- 440 Chinese Loess Plateau vegetation since the Last Glacial Maximum and its implications for vegetation restoration
W. Jiang, Y. Cheng, X. Yang and S. Yang
- 449 Restoration of trophic structure in an assemblage of omnivores, considering a revegetation chronosequence
H. Gibb and S. A. Cunningham

Invasives

- 459 PRIORITY CONTRIBUTION: Foxes are now widespread in Tasmania: DNA detection defines the distribution of this rare but invasive carnivore
S. D. Sarre, A. J. MacDonald, C. Barclay, G. R. Saunders and D. S. L. Ramsey
- 469 Reconstruction and prediction of invasive mongoose population dynamics from history of introduction and management: a Bayesian state-space modelling approach
K. Fukasawa, T. Hashimoto, M. Tataru and S. Abe
- 479 Minimizing invasive potential of *Miscanthus × giganteus* grown for bioenergy: identifying demographic thresholds for population growth and spread
D. P. Matlaga and A. S. Davis

Modelling for management

- 488 Matching observations and reality: using simulation models to improve monitoring under uncertainty in the Serengeti
A. Nuno, N. Bunnefeld and E. J. Milner-Gulland
- 499 Uncovering the links between foraging and breeding regions in a highly mobile mammal
D. J. F. Russell, B. McConnell, D. Thompson, C. Duck, C. Morris, J. Harwood and J. Matthiopoulos
- 510 Predicting the rate of invasion of the agent of Lyme disease *Borrelia burgdorferi*
N. H. Ogden, L. R. Lindsay and P. A. Leighton

- 519 EDITOR'S CHOICE: Comparing habitat configuration strategies for retaining biodiversity under climate change
K. Mokany, T. D. Harwood and S. Ferrier

- 528 Grazing management can counteract the impacts of climate change-induced sea level rise on salt marsh-dependent waterbirds
K. K. Clausen, M. Stjernholm and P. Clausen
