

RESEARCH ARTICLE

- 367 **Characterization of tradition Chinese medicine (TCM) starch for potential cosmetics industry application** Y. Xia, W. Gao, H. Wang, Q. Jiang, X. Li, L. Huang and P. Xiao
- 374 **Pasting, swelling, and solubility characteristics of rice batter prepared from different wet grinding systems** P. Sharma, V. Singh and R. Subramanian
- 382 **Physicochemical properties and antioxidant capacity of debranched starch-ferulic acid complexes** P. Van Hung, N. H. Phat and N. T. L. Phi
- 390 **Effect of dynamic high-pressure microfluidization on the morphology characteristics and physicochemical properties of maize amylose** Z. Tu, Y. Yin, H. Wang, G. Liu, L. Chen, P. Zhang, Y. Kou and L. Zhang
- 398 **Exploring the surface morphology of developing wheat starch granules by using Atomic Force Microscopy** R. N. Waduge, S. Xu, E. Bertoft and K. Seetharaman
- 410 **Untraditional source of starches – rhizome of *Dioscorea nipponica* Makino. from different geographical origins** Q. Jiang, W. Gao, Y. Shi, X. Li, Y. Xia and P. Xiao
- 417 **Preparation of Cu(II) ions adsorbent from acrylic acid-grafted corn starch in aqueous solutions** Q. Lu, P. Gao, H. Zhi, H. Zhao, Y. Yang and B. Sun
- 425 **Tough thermoplastic starch modified with polyurethane microparticles by reactive extrusion** Y. Zhang, L. Huang, H. Zhou, P. Zhang, M. Zhu, B. Fan and Q. Wu

SHORT COMMUNICATION

- 433 **A rapid method to obtaining moisture sorption isotherms of a starchy product** T. C. L. de Souza, H. A. L. de Souza and R. da S. Pena
- 437 **Changes in rapid visco-analysis (RVA) viscosity reveal starch digestion behaviours** A. Sorba and P. A. Sopade

Contents

Volume 65, No. 6, June 2013

RESEARCH ARTICLE

- 443 **Nanocomposites of crosslinked starch phthalate and silane modified nanoclay: Study of mechanical, thermal, morphological, and biodegradable characteristics** A. Ashamol, V. S. Priyambika, G. S. Avadhani and R. R. N. Sailaja
- 453 **Molecular properties of octenyl succinic esters of mechanically activated Indica rice starch** Z. Zhang, S. Zhao and S. Xiong
- 461 **Material properties of partially pregelatinized cassava starch prepared by mechanical activation** Y. Zhang, Z. Huang, C. Yang, A. Huang, H. Hu, Z. Gong, G. Sun and K. Huang
- 469 **Influence of metal ions on thermal generation of carbohydrate radicals in native and modified starch studied by EPR** M. Łabanowska, M. Kurdziel, E. Bidzińska, T. Fortuna, S. Pietrzyk, I. Przetaczek-Rożnowska and J. Rożnowski
- 483 **Influence of xanthan gum on viscoelastic retardation processes in starch pastes** P. Ptaszek
- 490 **Effect of emulsifiers on complexation, pasting, and gelling properties of native and chemically modified white sorghum (*Sorghum bicolor*) starch** T. M. Ali and A. Hasnain
- 499 **Effect of high methoxy pectin and sucrose on pasting, rheological, and textural properties of modified starch systems** D. Galkowska, M. Długosz and L. Juszcak
-
- 509 **Effect of resistant starch structure on short-chain fatty acids production by human gut microbiota fermentation in vitro** Z. Zhou, X. Cao and J. Y. H. Zhou
- 517 **The effect of low shear on the development of fortified extruded rice products** A. Ayoub, Y. Liu, D. D. Miller and S. S. H. Rizvi
-
- 527 **Process and financial considerations pertinent to hydrogel manufacture** M. H. Sorour, M. M. El Sayed, N. M. A. El Moneem, H. A. Talaat, H. F. Shaalan and S. M. El Marsafy
