

Ecological Research

The Ecological Society of Japan

Volume 28 • Number 3 • May 2013

■ Miyadi Award

Utsumi S

Evolutionary community ecology of plant-associated arthropods in terrestrial ecosystems 359

■ Original Articles

Kosugi Y, Takanashi S, Ueyama M, Ohkubo S, Tanaka H, Matsumoto K, Yoshifuji N, Ataka M, Sakabe A

Determination of the gas exchange phenology in an evergreen coniferous forest from 7 years of eddy covariance flux data using an extended big-leaf analysis 373

Chmara R, Szymeja J, Ulrich W

Patterns of abundance and co-occurrence in aquatic plant communities 387

Gao M

Detecting spatial aggregation from distance sampling: a probability distribution model of nearest neighbor distance 397

Chapperon C, Le Bris C, Seuront L

Thermally mediated body temperature, water content and aggregation behaviour in the intertidal gastropod *Nerita atramentosa* 407

Paz ALG, Romanowski HP, de Morais ABB

Distribution of Satyrini (Lepidoptera, Nymphalidae) in Rio Grande do Sul State, southern Brazil 417

Sridhara S, Edgaonkar A, Kumar A

Understorey structure and refuges from predators influence habitat use by a small ungulate, the Indian chevrotain (*Moschiola indica*) in Western Ghats, India 427

Seoane J, Villén-Pérez S, Carrascal LM

Environmental determinants of seasonal changes in bird diversity of Mediterranean oakwoods 435

Lü Y, Wang C, Jia Y, Du J, Ma X, Wang W, Pu G, Tian X

Responses of soil microbial biomass and enzymatic activities to different forms of organic nitrogen deposition in the subtropical forests in East China 447

Moison M, Schmitt FG, Souissi S

Differences in feeding activity between females and males of *Temora longicornis* 459

Selzer LJ, Lencinas MV, Martínez-Pastur GJ, Busso CA

Light and soil moisture effects on biomass and its allocation in *Osmorhiza depauperata* Philippi (Apiaceae) 469

Vergara PM, Pérez-Hernández CG, Hahn IJ, Soto GE

Deforestation in central Chile causes a rapid decline in landscape connectivity for a forest specialist bird species 481

Wu Y, Deng Y, Zhang J, Wu J, Tang Y, Cao G, Zhang F, Cui X

Root size and soil environments determine root lifespan: evidence from an alpine meadow on the Tibetan Plateau 493

Myczko Ł, Rosin ZM, Skórka P, Wylegała P, Tobolka M, Fliszkiewicz M, Mizera T, Tryjanowski P

Effects of management intensity and orchard features on bird communities in winter 503

Ahmadi M, Kaboli M, Nourani E, Alizadeh Shabani A, Ashrafi S

A predictive spatial model for gray wolf (*Canis lupus*) denning sites in a human-dominated landscape in western Iran 513

Sellin A, Tullus A, Niglas A, Öunapuu E, Karusion A, Lõhmus K

Humidity-driven changes in growth rate, photosynthetic capacity, hydraulic properties and other functional traits in silver birch (*Betula pendula*) 523

■ Note and Comment

Bacaro G, Gioria M, Ricotta C

Beta diversity reconsidered 537
