

REVIEW

Family-based association mapping in crop species

B. Guo · D. Wang · Z. Guo · W.D. Beavis 1419

ORIGINAL PAPERS

Identification of quantitative trait loci for resistance to *Verticillium* wilt and yield parameters in hop (*Humulus lupulus* L.)

J. Jakse · A. Cerenak · S. Radisek · Z. Satovic · Z. Luthar · B. Javornik 1431

Allele-specific marker development and selection efficiencies for both flavonoid 3'-hydroxylase and flavonoid 3',5'-hydroxylase genes in soybean subgenus *soja*

Y. Guo · L.-J. Qiu 1445

Contribution of an additive locus to genetic variance when inheritance is multi-factorial with implications on interpretation of GWAS

D. Gianola · F. Hospital · E. Verrier 1457

Erratum 1473

Population structure, genetic diversity and linkage disequilibrium in elite winter wheat assessed with SNP and SSR markers

T. Würschum · S.M. Langer · C.F.H. Longin · V. Korzun · E. Akhunov · E. Ebmeyer · R. Schachschneider · J. Schacht · E. Kazman · J.C. Reif 1477

Identification and QTL mapping of whitefly resistance components in *Solanum galapagense*

S. Firdaus · A.W. van Heusden · N. Hidayati · E.D.J. Supena · R. Mumm · R.C.H. de Vos · R.G.F. Visser · B. Vosman 1487

Genetic mapping of two genes conferring resistance to powdery mildew in common bean (*Phaseolus vulgaris* L.)

E. Pérez-Vega · N. Trabanco · A. Campa · J.J. Ferreira 1503

Genomic inversion caused by gamma irradiation contributes to downregulation of a *WBC11* homolog in *bloomless* sorghum

H. Mizuno · H. Kawahigashi · J. Ogata · H. Minami · H. Kanamori · H. Nakagawa · T. Matsumoto 1513

Identification of mitochondrial DNA sequence variation and development of single nucleotide polymorphic markers for CMS-D8 in cotton

H. Suzuki · J. Yu · F. Wang · J. Zhang 1521

Interaction between QTLs induces an advance in ethylene biosynthesis during melon fruit ripening

J. Vegas · J. Garcia-Mas · A.J. Monforte 1531

Fine mapping a major QTL for kernel number per row under different phosphorus regimes in maize (*Zea mays* L.)

G. Zhang · X. Wang · B. Wang · Y. Tian · M. Li · Y. Nie · Q. Peng · Z. Wang 1545

Genetic characterization and fine mapping of the novel *Phytophthora* resistance gene in a Chinese soybean cultivar

J. Zhang · C. Xia · X. Wang · C. Duan · S. Sun · X. Wu · Z. Zhu 1555

QTL for root angle and number in a population developed from bread wheats (*Triticum aestivum*) with contrasting adaptation to water-limited environments

J. Christopher · M. Christopher · R. Jennings · S. Jones · S. Fletcher · A. Borrell · A.M. Manschadi · D. Jordan · E. Mace · G. Hammer 1563

Haplotype variability and identification of new functional alleles at the *Rdg2a* leaf stripe resistance gene locus

C. Biselli · S. Urso · G. Tacconi · B. Steuernagel · D. Schulte · A. Gianinetti · P. Bagnaresi · N. Stein · L. Cattivelli · G. Valè 1575

Development of low-linolenic acid *Brassica oleracea* lines through seed mutagenesis and molecular characterization of mutants

H. Rahman · S.D. Singer · R.J. Weselake 1587

Stripe rust resistance genes in the UK winter wheat cultivar Claire

N.M. Powell · C.M. Lewis · S.T. Berry · R. MacCormack · L.A. Boyd 1599

Rph22: mapping of a novel leaf rust resistance gene introgressed from the non-host *Hordeum bulbosum* L. into cultivated barley (*Hordeum vulgare* L.)

P.A. Johnston · R.E. Nicks · V. Meiyalaghan · E. Blanchet · R. Pickering 1613

Identification of high-quality single-nucleotide polymorphisms in *Glycine latifolia* using a heterologous reference genome sequence

S. Chang · G.L. Hartman · R.J. Singh · K.N. Lambert · H.A. Hobbs · L.L. Domier 1627

Fast track genetic improvement of ascochyta blight resistance and double podding in chickpea by marker-assisted backcrossing

B. Taran · T.D. Warkentin · A. Vandenberg 1639

Identification of genetic markers linked to anthracnose resistance in sorghum using association analysis

H.D. Upadhyaya · Y.-H. Wang · R. Sharma · S. Sharma 1649

Association mapping combined with linkage analysis for aluminum tolerance among soybean cultivars released in Yellow and Changjiang River Valleys in China

P.C. Korir · J. Zhang · K. Wu · T. Zhao · J. Gai 1659

Genetic control of soybean seed oil: II. QTL and genes that increase oil concentration without decreasing protein or with increased seed yield

M. Eskandari · E.R. Cober · I. Rajcan 1677
