

C O N T E N T S

Responses of a small-mammal community to habitat management through controlled burning in a protected Mediterranean area <i>S. Moreno and C. Rouco</i>	1
<i>Pseudotsuga menziesii</i> invasion in native forests of Patagonia, Argentina: What about mycorrhizas? <i>M.E. Salgado Salomón, C. Barroetaveña and M. Rajchenberg</i>	5
Experimental evidence that livestock grazing intensity affects the activity of a generalist predator <i>N. Villar, X. Lambin, D. Evans, R. Pakeman and S. Redpath</i>	12
Scale-dependent diversity patterns affect spider assemblages of two contrasting forest ecosystems <i>A. Schuldt, T. Assmann and M. Schaefer</i>	17
Predicting impacts of climate change on medicinal asclepiads of Pakistan using Maxent modeling <i>R. Khanum, A.S. Mumtaz and S. Kumar</i>	23
Herbivory at marginal populations: Consequences for maternal fitness and vegetative differentiation <i>A.R. Castilla, C. Alonso and C.M. Herrera</i>	32
The impact of seed extraction on the population dynamics of <i>Pinus maximartinezii</i> <i>L. López-Mata</i>	39
Optimizing protection efforts for amphibian conservation in Mediterranean landscapes <i>E. García-Muñoz, F. Ceacero, M.A. Carretero, L. Pedrajas-Pulido, G. Parra and F. Guerrero</i>	45
Unraveling landscapes with phytogenic mounds (nebkhas): An exploration of spatial pattern <i>J.J. Quets, S. Temmerman, M.I. El-Bana, S.L. Al-Rowaily, A.M. Assaeed and I. Nijs</i>	53
Is evenness altered by fire in natural assemblages of soil arthropods? <i>M. Pitzalis, M.A. Bologna and L. Luiselli</i>	64
Species richness – Energy relationships and dung beetle diversity across an aridity and trophic resource gradient <i>B.P. Tshikae, A.L.V. Davis and C.H. Scholtz</i>	71

Contents continued from outside back cover

Effects of sea level rise on mangrove <i>Avicennia</i> population growth, colonization and establishment: Evidence from a field survey and greenhouse manipulation experiment <i>W. Lu, L. Chen, W. Wang, N. Fung-Yee Tam and G. Lin</i>	83
A successful avian invasion occupies a marginal ecological niche <i>H.R. Batalha, J.A. Ramos and G.C. Cardoso</i>	92
Effects of time since fire on birds in a plant diversity hotspot <i>L. Chalmandrier, G.F. Midgley, P. Barnard and C. Sirami</i>	99
Drove roads: Keystone structures that promote ant diversity in Mediterranean forest landscapes <i>F.M. Azcárate, J. Seoane, S. Castro and B. Peco</i>	107
Fire occurrence and tussock size modulate facilitation by <i>Ampelodesmos mauritanicus</i> <i>G. Incerti, D. Giordano, A. Stinca, M. Senatore, P. Termolino, S. Mazzoleni and G. Bonanomi</i>	116
