

**VOL. 174**

|   |           |
|---|-----------|
| <b>Meta-analysis of strategies to control nitrate leaching in irrigated agricultural systems and their effects on crop yield</b><br>M. Quemada, M. Baranski, M.N.J. Nobel-de Lange, A. Vallejo and J.M. Cooper (Spain, UK) .....            | <b>1</b>  |
| <b>Trade-offs between land use intensity and avian biodiversity in the dry Chaco of Argentina: A tale of two gradients</b><br>L. Macchi, H.R. Grau, P.V. Zelaya and S. Marinaro (Argentina) .....   | <b>11</b> |
| <b>Dynamics of soil organic carbon fractions one year after the re-conversion of poplar and willow plantations to arable use and perennial grassland</b><br>C. Toenshoff, R.G. Joergensen, R. Stuelpnagel and C. Wachendorf (Germany) ..... | <b>21</b> |
| <b>Agrobiodiversity performance in contrasting island environments: The case of shifting cultivation in Vanuatu, Pacific</b><br>J. Blanco, L. Pascal, L. Ramon, H. Vandenbroucke and S.M. Carrière (France, Vanuatu) .....                  | <b>28</b> |
| <b>Earthworms can increase nitrous oxide emissions from managed grassland: A field study</b><br>I.M. Lubbers, E.L. González, E.W.J. Hummelink and J.W. Van Groenigen (The Netherlands, USA).....  | <b>40</b> |
| <b>A comparison of soil organic carbon stocks in Viking Age and modern land use systems in Denmark</b><br>H. Breuning-Madsen, J.Aa. Kristensen, M.K. Holst, T. Balstroem and P.S. Henriksen (Denmark).....                                  | <b>49</b> |
