

Soil & Plant Science

CONTENTS

ORIGINAL ARTICLES

- 383 Effect of conservation and conventional tillage on soil water storage, water use efficiency and productivity of corn and soybean in Northeast China
S. Liu, X.-Y. Zhang, J. Yang and C.F. Drury
- 395 Comparison of PCR-based molecular markers for identification of *Mi* gene
Z. Devran, B. Başköylü, A. Taner and F. Doğan
- 403 Land use practices in the Central Himalayan region affect soil enzyme activities and their relationship with carbon pools
J.G. Kalambukattu, R.D. Singh, A.K. Patra, K. Arunkumar and J. Pote
- 409 Soil compaction limits root development, radiation-use efficiency and yield of three winter wheat (*Triticum aestivum* L.) cultivars
M.N. Andersen, L.J. Munkholm and A.L. Nielsen
- 420 Nematodes threats to global food security
M.A. Hassan, T.H. Pham, H. Shi and J. Zheng
- 426 Enhanced release of fluoride from rhizosphere soil of tea plants by organic acids and reduced secretion of organic acids by fluoride supply
L. Wang, J. Tang, B. Xiao, Y. Yang and Y. Yu
- 433 Repeated water absorbency of super-absorbent polymers in agricultural field applications: a simulation study
W. Bai, J. Song and H. Zhang
- 442 Fractal estimation of soil water retention curves using CT images
Y. Cheng, J. Liu and J. Zhang
- 453 Influence of harvest time and storage location on the longevity of timothy (*Phleum pratense* L.) seed
L.T. Havstad and T.S. Aamlid
- 460 Nitrogen fertilization affected the pollen production and quality in apple cultivars "Jerseymac" and "Golden Delicious"
A. Atasay, H. Akgül, K. Uçgun and B. Şan
- 466 Red clover intercropping of apple orchards improves soil microbial community functional diversity
K. Jiao, S. Qin, D. Lyu, L. Liu and H. Ma
