Celebrating the 20th Anniversary of the AEHMS: The Aquatic Ecosystem Puzzle

Celebratory articles

M. Munawar, President and Chief Editor, AEHMS 125

Africa: M. Van der Knaap

Asia: G. Nagaraj, F. Yusoff, N. Shazili, A. Sharma, D. Wang

Europe: A. Price, M. Kernan, G. Dave

Middle East: W. Hamza, A. Al-Ghadban

North America: J. Hartig, R. Heath, J. Leach, D. Malley, E. Mills, C. Minns,

T. Nalepa, H. Regier, J. Sherry

Contributed articles from conference AEHMS 10: The Aquatic Ecosystem Puzzle

Editorial 163

M. Munawar

***May we eat biodiversity? How to solve the impasse of conservation and exploitation of biodiversity and fishery resources** 164

M. Van der Knaap (Africa)

Freshwater estimates of prokaryotic respiration in tropical Central America 172

P. C. Pollard (Australia)

Are symbiotic algae in corals in northern parts of the Persian Gulf resistant to thermal stress? 177

P. G. Mostafavi, M. G. Ashrafi, and H. Dehghani (Iran)

Planktonic community metabolism in two stratified Mediterranean reservoirs with different trophic status 183

L. Romero-Martínez, M. Morales-Pineda, B. Úbeda, S. A. Loiselle, A. Cózar, and J. A. Gálvez (Spain)

Impact of climate change on the hydrology of shallow Lake Trasimeno (Umbria, Italy): History, forecasting and management 190

A. Ludovisi, E. Gaino, M. Bellezza, and S. Casadei (Italy)

(Contents continued)

- The status of the southernmost part (Lake Pihkva) of large Lake Peipsi: A purification pond or polluter?** 198
J. Haberman, M. Haldna, and R. Laugaste (Estonia)
- Assessment of groundwater vulnerability to pollution of a wetland watershed: The case study of the Oualidia-Sidi Moussa wetland, Morocco** 205
H. El Himer, Y. Fakir, T. Y. Stigter, M. Lepage, A. El Mandour, and L. Ribeiro (Morocco)
- Modelling the photochemical generation kinetics of 2-methyl-4-chlorophenol, an intermediate of the herbicide MCPA (2-methyl-4-chlorophenoxyacetic acid) in surface waters** 216
E. De Laurentiis, M. Minella, M. Bodrato, V. Maurino, C. Minero, and D. Vione (Italy)
- Predictive model for phosphorus in large shallow Lake Peipsi: Approach based on covariance structures** 222
M. Haldna, T. Möls, O. Buhvestova, and K. Kangur (Estonia)
