

A global meta-analysis of the biodiversity and ecosystem service benefits of coffee and cacao agroforestry M. De Beenhouwer, R. Aerts and O. Honnay (Belgium).....	1
Alternative upland grazing systems: Impacts on livestock performance and sward characteristics M.D. Fraser, J.E. Vale and M.S. Dhanoa (UK)	8
Livestock grazing in intermountain depressional wetlands-Effects on plant strategies, soil characteristics and biomass L.M. Teuber, N. Hölzel and L.H. Fraser (Germany, Canada, Sweden)	21
The effectiveness of the nitrification inhibitor dicyandiamide (DCD) in reducing nitrate leaching and nitrous oxide emissions from a grazed winter forage crop in southern New Zealand R.M. Monaghan, L.C. Smith and C.A.M. de Klein (New Zealand).....	29
Is functional connectivity in common grasshopper species affected by fragmentation in an agricultural landscape? D. Keller, M.J. van Strien, M. Herrmann, J. Bolliger, P.J. Edwards, J. Ghazoul and R. Holderegger (Switzerland).....	39
Organic amendments affect phosphorus sorption characteristics in a paddy soil X. Yan, D. Wang, H. Zhang, G. Zhang and Z. Wei (China, USA)	47
Infected-not infected: Factors influencing the abundance of the endophyte <i>Neotyphodium lolii</i> in managed grasslands L. Dobrindt, H.-G. Stroh, J. Isselstein and S. Vidal (Germany).....	54
Sink or source—The potential of coffee agroforestry systems to sequester atmospheric CO ₂ into soil organic carbon M.R.A. Noponen, J.R. Healey, G. Soto and J.P. Haggard (UK, Costa Rica)	60
