Assessing preferential flow by simultaneously injecting nanoparticle and chemical tracers (10.1029/2012WR012148)
- 43 *Fanilo Ramasomanana, Anis Younes, and Philippe Ackerer*
Estimation of macrodispersion in 2-D highly heterogeneous porous media using the Eulerian-Lagrangian localized adjoint method (10.1029/2012WR012228)
- 54 *John T. Van Stan II, Kael Martin, Jan Friesen, Matthew T. Jarvis, Jessica D. Lundquist, and Delphis F. Levia*
Evaluation of an instrumental method to reduce error in canopy water storage estimates via mechanical displacement (10.1029/2012WR012666)
- 64 *Sean W. Fleming and David J. Sauchyn*
Availability, volatility, stability, and teleconnectivity changes in prairie water supply from Canadian Rocky Mountain sources over the last millennium (10.1029/2012WR012831)
- 75 *Jon D. Pelletier*
A robust, two-parameter method for the extraction of drainage networks from high-resolution digital elevation models (DEMs): Evaluation using synthetic and Real-World DEMs (10.1029/2012WR012452)
- 90 *Alessio Radice, Vladimir Nikora, Jenny Campagnol, and Francesco Ballio*
Active interactions between turbulence and bed load: Conceptual picture and experimental evidence (10.1029/2012WR012255)
- 100 *Ben Livneh and Dennis P. Lettenmaier*
Regional parameter estimation for the unified land model (10.1029/2012WR012220)
- 115 *Patricia M. Saco and Mariano Moreno-de las Heras*
Ecogeomorphic coevolution of semiarid hillslopes: Emergence of banded and striped vegetation patterns through interaction of biotic and abiotic processes (10.1029/2012WR012001)
- 127 *Ida Bülow Gregersen, Henrik Madsen, Dan Rosbjerg, and Karsten Arnbjerg-Nielsen*
A spatial and nonstationary model for the frequency of extreme rainfall events (10.1029/2012WR012570)
- 137 *Pei Xin, Ling Li, and D. A. Barry*
Tidal influence on soil conditions in an intertidal creek-marsh system (10.1029/2012WR012290)
- 151 *Nicole K. Davi, Neil Pederson, Caroline Leland, Baatarbileg Nachin, Byambagerel Suran, and Gordon C. Jacoby*
Is eastern Mongolia drying? A long-term perspective of a multidecadal trend (10.1029/2012WR011834)
- 159 *Guoliang Cao, Chunmiao Zheng, Bridget R. Scanlon, Jie Liu, and Wenpeng Li*
Use of flow modeling to assess sustainability of groundwater resources in the North China Plain (10.1029/2012WR011899)
- 176 *Qinghui Jiang, Chi Yao, Zuyang Ye, and Chuangbing Zhou*
Seepage flow with free surface in fracture networks (10.1029/2012WR011991)

- 187 *Simon Michael Papalexiou and Demetris Koutsoyiannis*
Battle of extreme value distributions: A global survey on extreme daily rainfall (10.1029/2012WR012557)
- 202 *José F. Rodríguez, Carlos M. García, and Marcelo H. García*
Three-dimensional flow in centered pool-riffle sequences (10.1029/2011WR011789)
- 216 *Michael C. Sukop, Haibo Huang, Pedro F. Alvarez, Evan A. Variano, and Kevin J. Cunningham*
Evaluation of permeability and non-Darcy flow in vuggy macroporous limestone aquifer samples with lattice Boltzmann methods* (10.1029/2011WR011788)
- 231 *Denis Mutibwa and Suat Irmak*
AVHRR-NDVI-based crop coefficients for analyzing long-term trends in evapotranspiration in relation to changing climate in the U.S. High Plains (10.1029/2012WR012591)
- 245 *Sanjeev Kumar Jha, Gregoire Mariethoz, Jason P. Evans, and Matthew F. McCabe*
Demonstration of a geostatistical approach to physically consistent downscaling of climate modeling simulations (10.1029/2012WR012602)
- 260 *L. Foglia, S. W. Mehl, M. C. Hill, and P. Burlando*
Evaluating model structure adequacy: The case of the Maggia Valley groundwater system, southern Switzerland (10.1029/2011WR011779)
- 283 *April BryantMason, Y. Jun Xu, and Mark A. Altabet*
Limited capacity of river corridor wetlands to remove nitrate: A case study on the Atchafalaya River Basin during the 2011 Mississippi River Flooding (10.1029/2012WR012185)
- 291 *Alireza Nazemi, Howard S. Wheater, Kwok P. Chun, and Amin Elshorbagy*
A stochastic reconstruction framework for analysis of water resource system vulnerability to climate-induced changes in river flow regime (10.1029/2012WR012755)
- 306 *A. Revil*
Effective conductivity and permittivity of unsaturated porous materials in the frequency range 1 mHz–1GHz (10.1029/2012WR012700)
- 328 *Morteza Khodabakhshi and Behnam Jafarpour*
A Bayesian mixture-modeling approach for flow-conditioned multiple-point statistical facies simulation from uncertain training images (10.1029/2011WR010787)
- 343 *Steven V. Weijjs, Raphaël Mutzner, and Marc B. Parlange*
Could electrical conductivity replace water level in rating curves for alpine streams? (10.1029/2012WR012181)
- 352 *M. Willmann, G. W. Lanyon, P. Marschall, and W. Kinzelbach*
A new stochastic particle-tracking approach for fractured sedimentary formations (10.1029/2012WR012191)
- 360 *Rohini Kumar, Luis Samaniego, and Sabine Attinger*
Implications of distributed hydrologic model parameterization on water fluxes at multiple scales and locations (10.1029/2012WR012195)
- 380 *Feifei Zheng, Angus R. Simpson, and Aaron C. Zecchin*
A decomposition and multistage optimization approach applied to the optimization of water distribution systems with multiple supply sources (10.1029/2012WR013160)
- 400 *Florian Lauer, Hans-Georg Frede, and Lutz Breuer*
Uncertainty assessment of quantifying spatially concentrated groundwater discharge to small streams by distributed temperature sensing (10.1029/2012WR012537)
