

715 **Morphology, physical, chemical, and functional properties of starches from cereals, legumes, and tubers cultivated in Africa: A review** M. N. Emmambux and J. R. N. Taylor

RESEARCH ARTICLE

730 **Improvement of fonio dough properties through starch modification by sourdough fermentation** M. O. Edema, M. N. Emmambux and J. R. N. Taylor

738 **Effect of steeping additives on tef starch extraction and its quality** T. Nyakabau, O. C. Wokadala and M. N. Emmambux

747 **Effect of fermentation periods on chemical and physicochemical properties of cocoyam starch** A. O. Obadina, G. D. Fegha and A. O. Olugbile

753 **Effect of harvesting periods on the morphology and physico-chemical properties of trifoliolate yam starches** R. Akinoso and O. A. Abiodun

762 **Hydroxypropyl derivatives of legume starches: Functional, rheological and thermal properties** A. O. Oladebeye, A. A. Oshodi, I. A. Amoo and A. A. Karim

773 **Maize and teff starches modified with stearic acid as potential fat replacer in low calorie mayonnaise-type emulsions** W. H. Teklehaimanot, K. G. Duodu and M. N. Emmambux

782 **Influence of starch oxidation and phosphorylation on thermal generation of carbohydrate radicals studied by electron paramagnetic resonance** M. Łabanowska, M. Kurdziel, E. Bidzińska, A. Weselucha-Birczyńska, D. Pawcenis, T. Łojewski, T. Fortuna, S. Pietrzyk and I. Przetaczek-Rożnowska

791 **On the differences in the granular architecture and starch structure between pericarp and endosperm wheat starches** D. N. Kalinga, R. Waduge, Q. Liu, R. Y. Yada, E. Bertoft and K. Seetharaman

801 **Effect of phosphorus on the characteristics of starch in winter wheat** C. Y. Li, C. Li, R. Q. Zhang and W. Liang

- 808 **Effect of shearing on functional properties of starches isolated from Indian kidney beans** S. Kaur, A. Kaur, N. Singh and N. S. Sodhi
- 814 **Green synthesis method of silver nanoparticles using starch as capping agent applied the methodology of surface response** L. Ortega-Arroyo, E. S. Martin-Martinez, M. A. Aguilar-Mendez, A. Cruz-Orea, I. Hernandez-Pérez and C. Glorieux
- 822 **Molecular structure of starch in grains is not affected by common dwarfing genes in rice (*sd1*) and sorghum (*dw3*)** R. G. Gilbert, D. J. Y. Besnard, A. J. Reeve, C. J. Lambrides and J. Hasjim
- 831 **Comparative study on the blends of PBS/thermoplastic starch prepared from waxy and normal corn starches** J. Li, X. Luo, X. Lin and Y. Zhou
- 840 **Preparation and characterization of starch/EVA composite foams with surface modified kaolin** Y. Zheng, Y. Zhang, L. Zhang, Y. Liu and Q. Zhou
- 848 **The effect of granule surface area on hydrolysis of native starches by pullulanase** K.-H. Jung, M.-J. Kim, S.-H. Park, H.-S. Hwang, S. Lee, J.-H. Shim, M.-J. Kim, J.-C. Kim and H. Lee
- 854 **Effects of succinic acid cross-linking and mono-phosphorylation of oxidized cassava starch on its paste viscosity stability and sizability** Z. Zhu, H. Zheng and X. Li
- 864 **Comparison of microwave processing and excess steam jet cooking for spherulite production from amylose–fatty acid inclusion complexes** F. C. Felker, J. A. Kenar, G. F. Fanta and A. Biswas
- 875 **Strain improvement by mutation for enhanced production of starch-saccharifying glucoamylase from *Bacillus licheniformis*** M. Ghani, A. Aman, H. U. Rehman, N. N. Siddiqui and S. A. U. Qader
-
- 885 **Structure of starch hydrolysates following in vitro oral digestion: Effect of botanical source of starch and hydrothermal treatments** K. K. M. Nantanga, E. Bertoft and K. Seetharaman
