

# Contents

## Commentary

- 2929 **An estimate of the global sink for nitrous oxide in soils**  
William H. Schlesinger

## Opinion

- 2932 **Microclimatic challenges in global change biology**  
Kristen A. Potter, H. Arthur Woods and Sylvain Pincebourde

## Reviews

- 2940 **The impacts of climate change and human activities on biogeochemical cycles on the Qinghai-Tibetan Plateau**  
Huai Chen, Qiuhan Zhu, Changhui Peng, Ning Wu, Yanfen Wang, Xiuqing Fang, Yongheng Gao, Dan Zhu, Gang Yang, Jianqing Tian, Xiaoming Kang, Shilong Piao, Hua Ouyang, Wenhua Xiang, Zhibin Luo, Hong Jiang, Xingzhang Song, Yao Zhang, Guirui Yu, Xinquan Zhao, Peng Gong, Tandong Yao and Jianghua Wu
- 2956 **Soil nitrous oxide emissions following crop residue addition: a meta-analysis**  
Huaihai Chen, Xuechao Li, Feng Hu and Wei Shi

## Primary Research Articles

- 2965 **Soil moisture's underestimated role in climate change impact modelling in low-energy systems**  
Peter Christiaan le Roux, Juha Aalto and Miska Luoto
- 2976 **Drought-induced saltwater incursion leads to increased wetland nitrogen export**  
Marcelo Ardón, Jennifer L. Morse, Benjamin P. Colman and Emily S. Bernhardt
- 2986 **Global patterns of nitrogen limitation: confronting two global biogeochemical models with observations**  
R. Quinn Thomas, Sönke Zaehle, Pamela H. Templer and Christine L. Goodale
- 2999 **Nitrous oxide emissions in the Shanghai river network: implications for the effects of urban sewage and IPCC methodology**  
Zhongjie Yu, Huanguang Deng, Dongqi Wang, Mingwu Ye, Yongjie Tan, Yangjie Li, Zhenlou Chen and Shiyuan Xu
- 3011 **Regional decline in growth rates of massive *Porites* corals in Southeast Asia**  
Jani T. I. Tanzil, Barbara E. Brown, Richard P. Dunne, Jen N. Lee, Jaap A. Kaandorp and Peter A. Todd
- 3024 **Response of mollusc assemblages to climate variability and anthropogenic activities: a 4000-year record from a shallow bar-built lagoon system**  
Robert M. Cerrato, Philip V. Locicero and Steven L. Goodbred
- 3037 **Increased CO<sub>2</sub> stimulates reproduction in a coral reef fish**  
Gabrielle M. Miller, Sue-Ann Watson, Mark I. McCormick and Philip L. Munday
- 3046 **Climate and ecosystem linkages explain widespread declines in North American Atlantic salmon populations**  
Katherine E. Mills, Andrew J. Pershing, Timothy F. Sheehan and David Mountain
- 3062 **Ecological emergence of thermal clines in body size**  
Eric Edeline, Gérard Lacroix, Christine Delire, Nicolas Poulet and Stéphane Legendre
- 3069 **Thermal controls of Yellowstone cutthroat trout and invasive fishes under climate change**  
Robert Al-Chokhachy, Jay Alder, Steven Hostetler, Robert Gresswell and Bradley Shepard

- 3082 **Forecasting range expansion into ecological traps: climate-mediated shifts in sea turtle nesting beaches and human development**  
David A. Pike
- 3093 **The impact of climate change measured at relevant spatial scales: new hope for tropical lizards**  
Michael L. Logan, Ryan K. Huynh, Rachel A. Precious and Ryan G. Calsbeek
- 3103 **Native bees buffer the negative impact of climate warming on honey bee pollination of watermelon crops**  
Romina Rader, James Reilly, Ignasi Bartomeus and Rachael Winfree
- 3111 **Satellite microwave detection of boreal forest recovery from the extreme 2004 wildfires in Alaska and Canada**  
Matthew O. Jones, John S. Kimball and Lucas A. Jones
- 3123 **Changes in the timing of hay cutting in Germany do not keep pace with climate warming**  
Anna Bock, Tim H. Sparks, Nicole Estrella and Annette Menzel
- 3133 **Dampening effects of long-term experimental drought on growth and mortality rates of a Holm oak forest**  
Adrià Barbeta, Romà Ogaya and Josep Peñuelas
- 3145 **Predicting species-specific responses of fungi to climatic variation using historical records**  
Jeffrey M. Diez, Timothy Y. James, Marshall Mcmunn and Inés Ibáñez
- 3155 **Chronic ozone exacerbates the reduction in photosynthesis and acceleration of senescence caused by limited N availability in *Nicotiana sylvestris***  
Craig R. Yendrek, Courtney P. Leisner and Elizabeth A. Ainsworth
- 3167 **Large-scale variations in the vegetation growing season and annual cycle of atmospheric CO<sub>2</sub> at high northern latitudes from 1950 to 2011**  
Jonathan Barichivich, Keith R. Briffa, Ranga B. Myneni, Timothy J. Osborn, Thomas M. Melvin, Philippe Ciais, Shilong Piao and Compton Tucker
- 3184 **Drought response of five conifer species under contrasting water availability suggests high vulnerability of Norway spruce and European larch**  
Mathieu Lévesque, Matthias Saurer, Rolf Siegwolf, Britta Eilmann, Peter Brang, Harald Bugmann and Andreas Rigling
- 3200 **Single rice growth period was prolonged by cultivars shifts, but yield was damaged by climate change during 1981–2009 in China, and late rice was just opposite**  
Fulu Tao, Zhao Zhang, Wenjiao Shi, Yujie Liu, Dengpan Xiao, Shuai Zhang, Zhu Zhu, Meng Wang and Fengshan Liu
- 3210 **Pea aphid promotes amino acid metabolism both in *Medicago truncatula* and bacteriocytes to favor aphid population growth under elevated CO<sub>2</sub>**  
Huijuan Guo, Yucheng Sun, Yuefei Li, Bin Tong, Marvin Harris, Keyan Zhu-Salzman and Feng Ge
- 3224 **Population dynamics can be more important than physiological limits for determining range shifts under climate change**  
Damien A. Fordham, Camille Mellin, Bayden D. Russell, Reşit H. Akçakaya, Corey J. A. Bradshaw, Matthew E. Aiello-Lammens, Julian M. Caley, Sean D. Connell, Stephen Mayfield, Scoresby A. Shepherd and Barry W. Brook

#### **Technical Advance**

- 3238 **Soil organic carbon dust emission: an omitted global source of atmospheric CO<sub>2</sub>**  
Adrian Chappell, Nicholas P. Webb, Harry J. Butler, Craig L. Strong, Grant H. McTainsh, John F. Leys and Raphael A. Viscarra Rossel
