

Ecology, Biological Processes and Plant Interactions

Anthroposol development from limestone quarry substrates

A. C. Cohen-Fernández, M. A. Naeth, and S. R. Wilkinson 555–566

Reduced mineralizable carbon in a boreal forest soil after three years of artificial warming

L. D'Orangeville, B. Côté, D. Houle, and J. Whalen 567–572

Composition and Chemical Processes

Effects of liquid hog manure on soil available nitrogen status, nitrogen leaching losses and wheat yield on a sandy loam soil of western Canada

P. Nikiéma, K. E. Buckley, J. M. Enns, H. Quang, and O. O. Akinremi 573–584

Predicting EC_e of the saturated paste extract from value of $EC_{1:5}$

Y. He, T. DeSutter, D. Hopkins, X. Jia, and D. A. Wysocki 585–594

Expression et prédiction du pouvoir tampon des amendements et des engrais organiques

C. Masso et L. Khiari 595–606

Particulate organic matter and soil mineral nitrogen concentrations are good predictors of the soil nitrogen supply to canola following legume and non-legume crops in western Canada

M. St. Luce, N. Ziadi, B. J. Zebarth, J. K. Whalen, C. A. Grant, E. G. Gregorich, G. P. Lafond, R. E. Blackshaw, E. N. Johnson, J. T. O'Donovan, and K. N. Harker

607–620

Physical Processes and Interfaces

Predicting surface area of coarse-textured soils: Implications for weathering rates

C. J. Whitfield and C. Reid 621–630

Contamination and Environmental Stewardship

Hexachlorobenzene accumulation in rice plants as affected by farm manure and urea applications in dissimilar soils

C.-Y. Liu, X. Jiang, J.-L. Fan, and N. Ziadi 631–638

Agrometeorology

Net CO_2 and N_2O exchange during perennial forage establishment in an annual crop rotation in the Red River Valley, Manitoba

S. E. Maas, A. J. Glenn, M. Tenuta, and B. D. Amiro 639–652

Author Index

653–654

Subject Index

655–659
