

Special Issue:
Soil, Water, and Vegetation Monitoring and Modelling
Guest Editors: Lucio Ubertini and Fernando Miralles-Wilhelm

New Frontiers of Hydrology: Soil, Water, and Vegetation Monitoring and Modelling: L. Ubertini and F. R. Miralles-Wilhelm	iii
Flood Hazard Assessment Via Threshold Binary Classifiers: Case Study of the Tanaro River Basin: M. Degiorgis, G. Gnecco, S. Gorni, G. Roth, M. Sanguineti and A. C. Taramasso	1
Comparing a Large-Scale Dem-Based Floodplain Delineation Algorithm with Standard Flood Maps: The Tiber River Basin Case Study: F. Nardi, C. Biscarini, S. Di Francesco, P. Manciola and L. Ubertini	11
Challenges in Mechanistic and Empirical Modelling of Stormwater: Review and Perspectives: S. Al-Amin and O. I. Abdul-Aziz	20
Orsadem: A One-Dimensional Shallow Water Code for Flood Inundation Modelling: G. Petaccia and E. Natale	29
A Stochastic Index Method for Calculating Annual Flow Duration Curves in Intermittent Rivers: M. Rianna, A. Efstratiadis, F. Russo, F. Napolitano and D. Koutsoyiannis	41
Evaluation of Rainfall Thresholds Through Entropy: Influence of Bivariate Distribution Selection: E. Ridolfi, V. Montesarchio, M. Rianna, S. Sebastianelli, F. Russo and F. Napolitano	50
Antecedent Moisture Condition (SCS) Frequency Assessment: A Case Study in Southern Italy: F. De Paola, A. Ranucci and A. Feo	61
Water Quality Trading Programs Towards Solving Environmental Pollution Problems: J. Corrales, G. M. Naja, R. G. Rivero, F. Miralles-Wilhelm and M. G. Bhat	72
