

Review

Invited Review: Ethanol co-products for dairy cows: there goes our starch ... now what?

H. A. Paz, E. Castillo-Lopez, H. A. Ramirez-Ramirez, D. A. Christensen, T. J. Klopfenstein, and P. J. Kononoff 407-425

Welfare, Behaviour and Management

Associations of cow-level factors, frequency of feed delivery, and standing and lying behavior of dairy cows milked in an automatic system

J. A. Deming, R. Bergeron, K. E. Leslie, and T. J. DeVries 427-433

Large variations exist in prepartum activity among dairy cows continuously housed in a tie-stall barn

C. A. Felton, M. G. Colazo, C. J. Bench, and D. J. Ambrose 435-444

Comparison of management options for sows kept in pens with electronic feeding stations

Y. Z. Li and H. W. Gonyou 445-452

Effects of different heat stress periods on various blood and meat quality parameters in young Arbor Acer broiler chickens

S. Tang, J. Yu, M. Zhang, and E. Bao 453-460

Effect of previous ramp exposure and regular handling on heart rate, ease of handling and behaviour of near market-weight pigs during a simulated loading

S. Goumon, R. Bergeron, L. Faucitano, T. Crowe, M. L. Connor, and H. W. Gonyou 461-470

Growth and Development

Differences in muscle characteristics of piglets related to the sow parity

A. da Silva, D. Dalto, A. Lozano, E. de Oliveira, D. Gavioli, J. de Oliveira, N. Romero, and C. da Silva 471-475

Meat Science

Conjugated linoleic acid and betain prevent pork quality issues from diets containing distillers' dried grains with solubles

B. Su, L. Wang, H. Wang, B. Shi, A. Shan, and Y. Li 477-485

Physiology and Endocrinology

SHORT COMMUNICATION: Associations between chemical composition and physical properties of milk and colostrum with feed efficiency in beef cows
Y. R. Montanholi, S. Lam, V. Peripolli, G. Vander Voort, and S. P. Miller 487-492

Nonruminant Nutrition

Energy concentration and phosphorus digestibility in canola, cottonseed, and sunflower products fed to growing pigs

D. A. Rodríguez, R. C. Sulabo, J. C. González-Vega, and H. H. Stein 493-503

Restricting sulfur amino acid intake in growing pigs challenged with lipopolysaccharides decreases plasma protein and albumin synthesis

N. Litvak, J. K. Htoo, and C. F. M. de Lange 505-515

SHORT COMMUNICATION: Energy values and apparent total tract digestibility coefficients of copra meal and palm kernel meal fed to growing pigs

Y. D. Jang and Y. Y. Kim 517-521

Ruminant Nutrition

SHORT COMMUNICATION: Use of high-lipid by-product pellets as a partial replacement for barley grain and canola meal in finishing diets for beef steers

P. Górka, J. J. McKinnon, and G. B. Penner 523-528

SHORT COMMUNICATION: Ruminal pH profile and feeding behaviour of feedlot cattle transitioning from a high-forage to a high-concentrate diet

L. Holtshausen, K. S. Schwartzkopf-Genswein, and K. A. Beauchemin 529-533

Other

Evaluation of a shelf-stable direct-fed microbial for control of *Escherichia coli* O157 in commercial feedlot cattle

K. Stanford, D. Gibb, and T. A. McAllister 535-542

Summaries of Communications

Proceedings of the 2013 Meeting of the Animal Science Modelling Group 543-555
