

Breeding and Genetics

Candidate genes and biological pathways associated with carcass quality traits in beef cattle

B. K. Karisa, J. Thomson, Z. Wang, H. L. Bruce, G. S. Plastow, and S. S. Moore 295–306

Heritability of beef tenderness at different aging times and across breed comparisons

A. Zwambag, M. Kelly, F. Schenkel, I. Mandell, J. Wilton, and S. Miller 307–312

SHORT COMMUNICATION: Mitochondrial DNA D-loop sequence diversity and origin of Chinese pony breeds (*Equus caballus*)

S.-I. Yang, A.-P. Li, L.-x. Xu, and H. Yang 313–319

Meat Science

Changes in tenderness and cathepsins activity during post mortem ageing of yak meat

J.-C. Tian, L. Han, Q.-L. Yu, X.-X. Shi, and W.-T. Wang 321–328

Physiology and Endocrinology

The collection of multiple saliva samples from pigs and the effect on adrenocortical activity

N. J. Cook, S. M. Hayne, F. C. Rioja-Lang, A. L. Schaefer, and H. W. Gonyou 329–333

Nonruminant Nutrition

Amino acid digestibility in camelina products fed to growing pigs

F. N. Almeida, J. K. Htoo, J. Thomson, and H. H. Stein 335–343

Effect of dietary coriander oil and vegetable oil sources on fillet fatty acid composition of rainbow trout

K. M. Randall, M. J. T. Reaney, and M. D. Drew 345–352

Effect of different dietary levels of low-glucosinolate rapeseed (canola) meal and non-starch polysaccharide-degrading enzymes on growth performance and gut physiology of growing turkeys

Z. Zduńczyk, J. Jankowski, J. Juśkiewicz, D. Mikulski, and B. A. Slominski 353–362

Ruminant Nutrition

Rumen fermentation and microbial yield of high- or low-protein diets containing ground soybean seeds or homemade rapeseed expellers evaluated with RUSITEC

M. Guadagnin, F. Tagliapietra, M. Cattani, S. Schiavon, H. J. Worgan, A. Belanche, C. J. Newbold, and L. Bailoni 363–371

Effect of dried distillers' grains with solubles on enteric methane emissions and nitrogen excretion from finishing beef cattle

M. Hünerberg, S. M. McGinn, K. A. Beauchemin, E. K. Okine, O. M. Harstad, and T. A. McAllister 373–385

Effects of a commercial blend of essential oils and monensin in a high-grain diet containing wheat distillers' grains on in vitro fermentation

Y. L. Li, C. Li, K. A. Beauchemin, and W. Z. Yang 387–398

SHORT COMMUNICATION: Prediction of in vitro dry matter digestibility with the ANKOM Daisy II system of ruminant feeds using the gas production technique

J. C. Plaizier and S. Li 399–402

Erratum

403–405
