Research Articles

Role of prey and intraspecific density dependence on the population growth of an avian top predator <i>J. Fernandez-de-Simon, F. Díaz-Ruiz, F. Cirilli, F.S. Tortosa, R. Villafuerte and P. Ferreras</i>	1
The impact of grazing management on Orthoptera abundance varies over the season in Mediterranean steppe-like grassland <i>J. Fonderflick, A. Besnard, A. Beuret, M. Dalmais and B. Schatz</i>	7
Twig–leaf size relationships in woody plants vary intraspecifically along a soil moisture gradient <i>X.-D. Yang, E.-R. Yan, S.X. Chang, X.-H. Wang, Y.-T. Zhao and Q.-R. Shi</i>	17
Inferring population and metapopulation dynamics of <i>Liparis loeselii</i> from single-census and inventory data <i>J.G.B. Oostermeijer and Y. Hartman</i>	30
Gender-related traits in the dioecious shrub <i>Empetrum rubrum</i> in two plant communities in the Magellanic steppe <i>M.C. Díaz-Barradas, M. Zunzunegui, M. Collantes, L. Álvarez-Cansino and F. García Novo</i>	40
Climate change triggers effects of fungal pathogens and insect herbivores on litter decomposition <i>O. Butenschoen and S. Scheu</i>	49
Short Communication	
Area and edge effects on leaf-litter decomposition in a fragmented subtropical dry forest <i>M.L. Moreno, M.L. Bernaschini, N. Pérez-Harguindeguy and G. Valladares</i>	26
