Research Articles

Oak-insect herbivore interactions along a temperature and precipitation gradient <i>E.H. Leckey, D.M. Smith, C.R. Nufio and K.F. Fornash</i>	1
Changes in spatial point patterns of pioneer woody plants across a large tropical landslide <i>E. Velázquez, M. De la Cruz and A. Gómez-Sal</i>	9
Fine-scale habitat structure complexity determines insectivorous bird diversity in a tropical forest <i>G.J. Castaño-Villa, S.A. Ramos-Valencia and F.E. Fontúrbel</i>	19
Linking species richness curves from non-contiguous sampling to contiguous-nested SAR: An empirical study <i>M. Lazarina, A.S. Kallimanis, J.D. Pantis and S.P. Sgardelis</i>	24
Ant community structure during forest succession in a subtropical forest in South-East China <i>M. Staab, A. Schuldt, T. Assmann, H. Bruelheide and A.-M. Klein</i>	32
The unusual suspect: Land use is a key predictor of biodiversity patterns in the Iberian Peninsula <i>I.S. Martins, V. Proença and H.M. Pereira</i>	41
The influence of mistletoes on birds in an agricultural landscape of central Mexico <i>I. Zuria, I. Castellanos and J.E. Gates</i>	51
Connectivity and propagule sources composition drive ditch plant metacommunity structure <i>L. Favre-Bac, A. Ernoult, C. Mony, Y. Rantier, J. Nabucet and F. Burel</i>	57
Priming effects on seed germination in <i>Tecoma stans</i> (Bignoniaceae) and <i>Cordia megalantha</i> (Boraginaceae), two tropical deciduous tree species <i>S. Alvarado-López, D. Soriano, N. Velázquez, A. Orozco-Segovia and A. Gamboa-deBuen</i>	65
Arbuscular mycorrhizal fungi facilitate the invasion of <i>Solidago canadensis</i> L. in southeastern China <i>R. Yang, G. Zhou, S. Zan, F. Guo, N. Su and J. Li</i>	71
