Research Articles

- 1 *Gráinne El Mountassir, Rebecca J. Lunn, Heather Moir, and Erica MacLachlan*
Hydrodynamic coupling in microbially mediated fracture mineralization: Formation of self-organized groundwater flow channels (doi 10.1002/2013WR013578)
- 17 *S. Tamea, J. A. Carr, F. Laio, and L. Ridolfi*
Drivers of the virtual water trade (doi 10.1002/2013WR014707)
- 29 *Aditi Mankad and Murni Greenhill*
Motivational indicators predicting the engagement, frequency and adequacy of rainwater tank maintenance (doi 10.1002/2013WR014338)
- 39 *Tim Beechie and Hiroo Imaki*
Predicting natural channel patterns based on landscape and geomorphic controls in the Columbia River basin, USA (doi 10.1002/2013WR013629)
- 58 *Scott K. Hansen and Bernard H. Kueper*
A new model for coupled multicomponent NAPL dissolution and aqueous-phase transport, with application to creosote dissolution in discrete fractures (doi 10.1002/2013WR013773)
- 71 *Valentin Wagner, Peter Bayer, Gerhard Bisch, Markus Kübert, and Philipp Blum*
Hydraulic characterization of aquifers by thermal response testing: Validation by large-scale tank and field experiments (doi 10.1002/2013WR013939)
- 86 *James D. S. Cullis, Lee F. Stanish, and Diane M. McKnight*
Diel flow pulses drive particulate organic matter transport from microbial mats in a glacial meltwater stream in the McMurdo Dry Valleys (doi 10.1002/2013WR014061)
- 98 *Germán Poveda, Liliana Jaramillo, and Luisa F. Vallejo*
Seasonal precipitation patterns along pathways of South American low-level jets and aerial rivers (doi 10.1002/2013WR014087)
- 119 *Abdullah Cihan, Jens Birkholzer, Tissa H. Illangasekare, and Quanlin Zhou*
A modeling approach to represent hysteresis in capillary pressure-saturation relationship based on fluid connectivity in void space (doi 10.1002/2013WR014280)
- 132 *D. Erdal, I. Neuweiler, and U. Wollschläger*
Using a bias aware EnKF to account for unresolved structure in an unsaturated zone model (doi 10.1002/2012WR013443)
- 148 *Simone Fatichi, Matthias J. Zeeman, Jürg Fuhrer, and Paolo Burlando*
Ecohydrological effects of management on subalpine grasslands: From local to catchment scale (doi 10.1002/2013WR014535)
- 165 *Clare Robinson, Pei Xin, Ling Li, and D. A. Barry*
Groundwater flow and salt transport in a subterranean estuary driven by intensified wave conditions (doi 10.1002/2013WR013813)
- 182 *K. Engeland and I. Steinsland*
Probabilistic postprocessing models for flow forecasts for a system of catchments and several lead times (doi 10.1002/2012WR012757)
- 198 *Xiaoyi Liu, Quanlin Zhou, Peter K. Kitanidis, and Jens T. Birkholzer*
Fast iterative implementation of large-scale nonlinear geostatistical inverse modeling* (doi 10.1002/2012WR013241)
- *This article is part of a Special Section—Advancing Computational Methods In Hydrology**
- 208 *G. E. Hammond, P. C. Lichtner, and R. T. Mills*
Evaluating the performance of parallel subsurface simulators: An illustrative example with PFLOTRAN* (doi 10.1002/2012WR013483)
- *This article is part of a Special Section—Advancing Computational Methods In Hydrology**

- 229 *Kaisa Västilä and Juha Järvelä*
Modeling the flow resistance of woody vegetation using physically based properties of the foliage and stem (doi 10.1002/2013WR013819)
- 246 *D. O'Malley and V. V. Vesselinov*
Groundwater remediation using the information gap decision theory (doi 10.1002/2013WR014718)
- 257 *Trevor Carey-Smith, John Sansom, and Peter Thomson*
A hidden seasonal switching model for multisite daily rainfall (doi 10.1002/2013WR014325)
- 273 *Marcus Fahle and Ottfried Dietrich*
Estimation of evapotranspiration using diurnal groundwater level fluctuations: Comparison of different approaches with groundwater lysimeter data (doi 10.1002/2013WR014472)
- 287 *Daniele Tonina, Charles Luce, and Frank Gariglio*
Quantifying streambed deposition and scour from stream and hyporheic water temperature time series (doi 10.1002/2013WR014567)
- 293 *Adam Winstral and Danny Marks*
Long-term snow distribution observations in a mountain catchment: Assessing variability, time stability, and the representativeness of an index site (doi 10.1002/2012WR013038)
- 306 *Zulia Mayari Sanchez-Mejia and Shirley A. Papuga*
Observations of a two-layer soil moisture influence on surface energy dynamics and planetary boundary layer characteristics in a semiarid shrubland* (doi 10.1002/2013WR014135)
***Companion paper to Sanchez-Mejia et al. [2014] doi:10.1002/2013WR014150**
- 318 *Laurel G. Larsen, Judson W. Harvey, and Morgan M. Maglio*
Dynamic hyporheic exchange at intermediate timescales: Testing the relative importance of evapotranspiration and flood pulses (doi 10.1002/2013WR014195)
- 336 *Francesco Serinaldi and Chris G. Kilsby*
Rainfall extremes: Toward reconciliation after the battle of distributions (doi 10.1002/2013WR014211)
- 353 *Pierre Brigode, Pietro Bernardara, Emmanuel Paquet, Joël Gailhard, Federico Garavaglia, Ralf Merz, Zoran Mićović, Deborah Lawrence, and Pierre Ribstein*
Sensitivity analysis of SCHADEX extreme flood estimations to observed hydrometeorological variability (doi 10.1002/2013WR013687)
- 371 *W. T. Crow and M. Tugrul Yilmaz*
The Auto-Tuned Land Data Assimilation System (ATLAS) (doi 10.1002/2013WR014550)
- 386 *M. Tugrul Yilmaz, Martha C. Anderson, Ben Zaitchik, Chris R. Hain, Wade T. Crow, Mutlu Ozdogan, Jong Ahn Chun, and Jason Evans*
Comparison of prognostic and diagnostic surface flux modeling approaches over the Nile River basin* (doi 10.1002/2013WR014194)
***This article is part of a Special Section—Climate, Hydrology and Water Resources of Eastern Africa**
- 409 *O. Rakovec, M. C. Hill, M. P. Clark, A. H. Weerts, A. J. Teuling, and R. Uijlenhoet*
Distributed Evaluation of Local Sensitivity Analysis (DELSA), with application to hydrologic models (doi 10.1002/2013WR014063)
- 427 *V. Girard, N. Lamouroux, and R. Mons*
Modeling point velocity and depth statistical distributions in steep tropical and alpine stream reaches (doi 10.1002/2013WR013894)
- 440 *Saeed Ovaysi and Mohammad Piri*
Pore-space alteration induced by brine acidification in subsurface geologic formations (doi 10.1002/2013WR014289)
- 453 *Marie-José Dole-Olivier, Chafik Maazouzi, Bernard Cellot, Frank Fiers, Diana M. P. Galassi, Cécile Claret, Dominique Martin, Sylvie Méricoux, and Pierre Marmonier*
Assessing invertebrate assemblages in the subsurface zone of stream sediments (0–15 cm deep) using a hyporheic sampler* (doi 10.1002/2012WR013207)
***This article is part of a Special Section—New Modelling Approaches and Novel Experimental Technologies for Improved Understanding of Process Dynamics at Aquifer-Surface Water Interfaces**
- 466 *John B. Gates, Gregory V. Steele, Paolo Nasta, and Jozsef Szilagyi*
Lithologic influences on groundwater recharge through incised glacial till from profile to regional scales: Evidence from glaciated Eastern Nebraska (doi 10.1002/2013WR014073)

- 482 *Sandra R. Villamizar, Henry Pai, Christopher A. Butler, and Thomas C. Harmon*
Transverse spatiotemporal variability of lowland river properties and effects on metabolic rate estimates
(doi 10.1002/2013WR014245)
- 494 *Ryan McGloin, Hamish McGowan, David McJannet, Freeman Cook, Andrey Sogachev, and Stewart Burn*
Quantification of surface energy fluxes from a small water body using scintillometry and eddy covariance
(doi 10.1002/2013WR013899)
- 514 *Tejshree Tiwari, Hjalmar Laudon, Keith Beven, and Anneli M. Ågren*
Downstream changes in DOC: Inferring contributions in the face of model uncertainties
(doi 10.1002/2013WR014275)
- 526 *Stefano Orlandini, Giovanni Moretti, and Andrea Gavioli*
Analytical basis for determining slope lines in grid digital elevation models (doi 10.1002/2013WR014606)
- 540 *R. Bordoy and P. Burlando*
Stochastic downscaling of precipitation to high-resolution scenarios in orographically complex regions: 1. Model evaluation* (doi 10.1002/2012WR013289)
***Companion paper to Bordoy and Burlando [2014] doi: 10.1002/wrcr.20443**
- 562 *R. Bordoy and P. Burlando*
Stochastic downscaling of climate model precipitation outputs in orographically complex regions: 2. Downscaling methodology* (doi 10.1002/wrcr.20443)
***Companion paper to Bordoy and Burlando [2014] doi: 10.1002/2012WR013289**
- 580 *C. Prakash Khedun, Ashok K. Mishra, Vijay P. Singh, and John R. Giardino*
A copula-based precipitation forecasting model: Investigating the interdecadal modulation of ENSO's impacts on monthly precipitation (doi 10.1002/2013WR013763)
- 601 *R. Modarres and T. B. M. J. Ouarda*
Modeling the relationship between climate oscillations and drought by a multivariate GARCH model
(doi 10.1002/2013WR013810)
- 619 *Conrado M. Rudorff, John M. Melack, and Paul D. Bates*
Flooding dynamics on the lower Amazon floodplain: 1. Hydraulic controls on water elevation, inundation extent, and river-floodplain discharge* (doi 10.1002/2013WR014091)
***Companion paper to Rudorff et al. [2014] doi:10.1002/2013WR014714**
- 635 *Conrado M. Rudorff, John M. Melack, and Paul D. Bates*
Flooding dynamics on the lower Amazon floodplain: 2. Seasonal and interannual hydrological variability*
(doi 10.1002/2013WR014714)
***Companion paper to Rudorff et al. [2014] doi: 10.1002/2013WR014091**
- 650 *Ashish Sharma and Raj Mehrotra*
An information theoretic alternative to model a natural system using observational information alone*
(doi 10.1002/2013WR013845)
***This article is part of a Special Section—Advancing Computational Methods In Hydrology**
