

SEED SCIENCE RESEARCH

CONTENTS

REVIEW PAPER

Activation and regulation of primary metabolism during seed germination

Rosental, L., Nonogaki, H. & Fait, A.

1-15

RESEARCH OPINION

What kind of seed dormancy might palms have?

Baskin, J.M. & Baskin, C.C.

17-22

RESEARCH PAPERS

Molecular cloning, gene expression and functional expression of a phosphoenolpyruvate carboxylase *Osppc1* in developing rice seeds: implication of involvement in nitrogen accumulation

Yamamoto, N., Kubota, T., Masumura, T., Shiraishi, N., Tanaka, K., Sugimoto, T. & Oji, Y.

23-36

Two imbibition properties independently influence the cultivar-specific flooding tolerance of dried soybean seeds

Jitsuyama, Y., Hagihara, Y. & Konno, Y.

37-48

Differential effects of reduced water potential on the germination of floodplain grassland species indicative of wet and dry habitats

Ludewig, K., Zelle, B., Eckstein, R.L., Mosner, E., Otte, A. & Donath, T.W.

49-61

Biochemical changes associated with gibberellic acid-like activity of smoke-water, karrikinolide and vermicompost leachate during seedling development of *Phaseolus vulgaris* L.

Singh, S., Kulkarni, M.G. & Van Staden, J.

63-70

SHORT COMMUNICATION

Seed mass, germination and seedling traits for some central Argentinian cacti

Pivatto, M-S., Funes, G., Ferreras, A.E. & Gurvich, D.E.

71-77
