 Multi-gene phylogenetic analysis of south-east Asian pest members of the *Bactrocera dorsalis* species complex (Diptera: Tephritidae) does not support current taxonomy 235–253
- T. KURIWADA, N. KUMANO, K. SHIROMOTO, D. HARAGUCHI**
 Mass-rearing conditions do not affect responsiveness to sex pheromone and flight activity in sweetpotato weevils 254–259
- S. READ, B. G. HOWLETT, B. J. DONOVAN, W. R. NELSON, R. F. VAN TOOR**
 Culturing chelifers (Pseudoscorpions) that consume Varroa mites 260–266
- J.-J. WANG, X.-B. LIU, Y.-A. ZHANG, C. WEN, J.-R. WEI**
 The reproductive capability of *Ooencyrtus kuvanae* reared on eggs of the factitious host *Antheraea pernyi* 267–272
- J. HAVELKA, M. ŽUROVCOVÁ, S. RYCHLÝ, P. STARÝ**
 Russian Wheat Aphid, *Diuraphis noxia* in the Czech Republic – cause of the significant population decrease 273–280
- I. B. BAOUA, L. AMADOU, N. OUMAROU, W. PAYNE, J. D. ROBERTS, K. STEFANOVA, C. NANSEN**
 Estimating effect of augmentative biological control on grain yields from individual pearl millet heads 281–288
- V. SUREKHA DEVI, P. A. RAO, S. P. SHARMA, H. C. SHARMA**
 Interaction of acid exudates in chickpea with biological activity of *Bacillus thuringiensis* towards *Helicoverpa armigera* 289–296
- A. ONZO, R. HANNA, M. TOKO**
 Mix-planting pubescent and glabrous cassava affects abundance of *Typhlodromalus aripo* and its prey mite *Mononychellus tanajoa* 297–306
- K. L. PRINGLE, J. M. HEUNIS, M. DE VILLIERS**
 Does dust result in mite outbreaks in apple orchards? 307–314
