

Labile soil organic carbon and nitrogen within a gradient of dryland agricultural land-use intensity in Wyoming, USA T.T. Huriisso, J.B. Norton and U. Norton	1
Determination of soil available water for plants: Consistency between laboratory and field measurements H. Asgarzadeh, M.R. Mosaddeghi, A.R. Dexter, A.A. Mahboubi and M.R. Neyshabouri	8
Fuzzy logic for acid sulfate soil mapping: Application to the southern part of the Finnish coastal areas A. Beucher, S. Fröjdö, P. Österholm, A. Martinkauppi and P. Edén	21
Revisiting the pseudo continuous pedotransfer function concept: Impact of data quality and data mining method A. Haghverdi, H.S. Öztürk and W.M. Cornelis	31
Potential adsorption of dissolved organic matter in poorly podzolised, high-latitude soils A. Pengerud, L.K. Johnsen, J. Mulder and L.T. Strand	39
Sampling season affects conclusions on soil arthropod community structure responses to metal pollution in Mediterranean urban soils L. Santorufo, C.A. Van Gestel and G. Maisto	47
Spatial scaling effects on variability of soil organic matter and total nitrogen in suburban Beijing K. Hu, S. Wang, H. Li, F. Huang and B. Li	54
Mapping trace element deficiency by cokriging from regional geochemical soil data: A case study on cobalt for grazing sheep in Ireland R.M. Lark, E.L. Ander, M.R. Cave, K.V. Knights, M.M. Glennon and R.P. Scanlon	64
Microbial residue indices down the soil profile after long-term addition of farmyard manure and mineral fertilizer to a sandy soil A. Sradnick, M. Oltmanns, J. Raupp and R.G. Joergensen	79
Precise observation of soil surface curling M. Zielinski, M. Sánchez, E. Romero and A. Atique	85
Soil organic carbon assessment by field and airborne spectrometry in bare croplands: accounting for soil surface roughness A. Denis, A. Stevens, B. van Wesemael, T. Udelhoven and B. Tychon	94
How to map soil organic carbon stocks in highly urbanized regions? V.I. Vasenev, J.J. Stoorvogel, I.I. Vasenev and R. Valentini	103
Comparison of methods for predicting regolith thickness in previously glaciated terrain, Stockholm, Sweden C.S.J. Karlsson, I.A. Jamali, R. Earon, B. Olofsson and U. Mörtberg	116
Evolution of soil properties following reclamation in coastal areas: A review J. Li, L. Pu, M. Zhu, J. Zhang, P. Li, X. Dai, Y. Xu and L. Liu	130
Sampling optimal calibration sets in soil infrared spectroscopy L. Ramirez-Lopez, K. Schmidt, T. Behrens, B. van Wesemael, J.A.M. Dematté and T. Scholten	140

Disaggregation of soil testing data on organic matter by the summary statistics approach to area-to-point kriging D.J. Brus, T.G. Orton, D.J.J. Walvoort, J.A. Reijneveld and O. Oenema	151
Adsorption, degradation and mobility of carbendazim in profiles of Polish mineral soils T. Paszko	160
Natural soil water repellency in different types of Mediterranean woodlands L.M. Zavala, J. García-Moreno, Á.J. Gordillo-Rivero, A. Jordán and J. Mataix-Solera	170
PTFs for predicting LLWR from various soil attributes including cementing agents M.R. Neyshabouri, Z. Kazemi, S. Oustan and M. Moghaddam	179
Effects of organic/inorganic amendments on trace elements dispersion by leachates from sulfide-containing tailings of the São Domingos mine, Portugal. Time evaluation E.S. Santos, M.C.F. Magalhães, M.M. Abreu and F. Macías	188
The influence of soil compaction and N fertilization on physico-chemical properties of Mollic Fluvisol soil under red clover/grass mixture T. Głąb and K. Gondek	204
Leaching of mercury from soils at extremely contaminated historical roasting sites (Idrija area, Slovenia) T. Teršič, H. Biester and M. Gosar	213
Petrography and genesis of Quaternary coastal gypcrete in North Kuwait, Arabian Gulf F.I. Khalaf, A. Al-Zamel and I. Gharib	223
Soil-forming factors and <i>Soil Taxonomy</i> J.G. Bockheim, A.N. Gennadiyev, A.E. Hartemink and E.C. Brevik	231
Regulation of soil moisture dynamics in agricultural fields using strips of native prairie vegetation J. Gutierrez-Lopez, H. Asbjornsen, M. Helmers and T. Isenhardt	238
The role of biological agents in the microstructural and mineralogical transformations in aluminium lateritic deposit in Central Brazil F.S. de Oliveira, A.F.D.C. Varajão, C.A.C. Varajão, C.E.G.R. Schaefer and B. Boulangé	250
Changes in soil total organic carbon after an experimental fire in a cold temperate coniferous forest: A sequenced monitoring approach X. Cui, F. Gao, J. Song, Y. Sang, J. Sun and X. Di	260
Changes in microbial community structure due to biochars generated from different feedstocks and their relationships with soil chemical properties N. Muhammad, Z. Dai, K. Xiao, J. Meng, P.C. Brookes, X. Liu, H. Wang, J. Wu and J. Xu	270
Influence of landscape position and transient water table on soil development and carbon distribution in a steep, headwater catchment S.W. Bailey, P.A. Brousseau, K.J. McGuire and D.S. Ross	279
The impact of parent material, climate, soil type and vegetation on Venetian forest humus forms: A direct gradient approach J.-F. Ponge, G. Sartori, A. Garlato, F. Ungaro, A. Zanella, B. Jabiól and S. Obber	290
Pedogenesis, permafrost, substrate and topography: Plot and landscape scale interrelations of weathering processes on the central-eastern Tibetan Plateau F. Baumann, K. Schmidt, C. Dörfer, J.-S. He, T. Scholten and P. Kühn	300
Introducing minimum spatial cross-correlation kriging as a new estimation method of heavy metal contents in soils B. Sohrabian and A.E. Tercan	317
Relations of iron, aluminum, and carbon along transitions from Udults to Aquods C. Banik, W.G. Harris, R. Ellis, W. Hurt and S. Balboa	332
Rhizosphere effects on soil solution composition and mineral stability D.G. McGahan, R.J. Southard and R.J. Zasoski	340
Influence of urban land development and soil rehabilitation on soil-atmosphere greenhouse gas fluxes Y. Chen, S.D. Day, R.K. Shrestha, B.D. Strahm and P.E. Wiseman	348
Can γ -radiometrics predict soil textural data and stoniness in different parent materials? A comparison of two machine-learning methods S. Priori, N. Bianconi and E.A.C. Costantini	354
End members, end points and extragrades in numerical soil classification P.A. Hughes, A.B. McBratney, B. Minasny and S. Campbell	365
Use of thermal analysis and solid-state ^{13}C CP-MAS NMR spectroscopy to diagnose organic matter quality in relation to burn severity in Atlantic soils A. Merino, A. Ferreira, J. Salgado, M.T. Fontúrbel, N. Barros, C. Fernández and J.A. Vega	376
Controls on dissolved organic carbon export through surface runoff from loamy agricultural soils N. Van Gaelen, V. Verschoren, W. Clymans, J. Poesen, G. Govers, J. Vanderborght and J. Diels	387

(continued)

A comparison of methods to assess susceptibility to soil sealing M. Pulido Moncada, D. Gabriels, D. Lobo, K. De Beuf, R. Figueroa and W.M. Cornelis	397
Cross polarization-single pulse/magic angle spinning (CPSP/MAS): A robust technique for routine soil analysis by solid-state NMR D. Courtier-Murias, H. Farooq, J.G. Longstaffe, B.P. Kelleher, K.M. Hart, M.J. Simpson and A.J. Simpson	405
An extension to “Mid-infrared spectral interpretation of soils: Is it practical or accurate?” X. Yang	415
Comments on “Inherent factors limiting the use of laser diffraction for determining particle size distributions of soil and related samples” by Kowalenko and Babuin (Geoderma 2013; 193–194: 22–28) G. Eshel, D.N. Warrington and G.J. Levy	418
Kowalenko and Babuin reply to: Comments on “Inherent factors limiting the use of laser diffraction for determining particle size distributions of soil and related samples” (Geoderma 2013; 193–194: 22–28) C.G. Kowalenko and D. Babuin	420
