

CONTENTS

Research articles

- Growth, nitrogen partitioning and nutritive value of fodder beet crops grown under different application rates of nitrogen fertiliser
E Chakwizira, JM de Ruiter and S Maley 75
- Economic feasibility of supplementary feeding on dairy farms in the Waikato region of New Zealand
GJ Doole 90
- Effects of flupropanate application on bare ground and broadleaf weeds when used to control Chilean needle grass in introduced pastures
CJ Grech, DA McLaren, J Lowien, L McWhirter, KL Butler and BM Sindel 100
- Dry matter intake and body condition score gain of dairy cows offered kale and grass
I Rugoho, SJ Gibbs and GR Edwards 110
- Time budget differences of high- and low-social rank grazing dairy cows
R Ungerfeld, C Cajarville, MI Rosas and JL Repetto 122
- Leaf anatomy and nutritive values of *Brachiaria ruziziensis* genotypes
FC Santos, AS Freitas, EM de Castro, LC Davide, F Souza Sobrinho and VH Techio 128
- Nitric and nitrous oxide fluxes following bovine urine deposition to summer-grazed pasture
S Khan, TJ Clough, KM Goh and RR Sherlock 136
