

Editor's Preface to a Special Collection

3641 *Helmut Habersack, Daniel Haspel, and Mathias Kondolf*

Large Rivers in the Anthropocene: Insights and tools for understanding climatic, land use, and reservoir influences* (doi 10.1002/2013WR014731)

***This article is part of a Special Section—Climatic, Hydrological, and Land Use Impacts on Large Rivers**

Introduction to a Special Collection

3647 *Luis Gimeno*

Oceanic sources of continental precipitation* (doi 10.1002/2014WR015477)

***This article is part of a Special Section—Oceanic Sources of Continental Precipitation**

Research Articles

3650 *Feifei Zheng, Angus R. Simpson, and Aaron C. Zecchin*

An efficient hybrid approach for multiobjective optimization of water distribution systems
(doi 10.1002/2013WR014143)

3672 *C. J. Landry, Z. T. Karpyn, and O. Ayala*

Relative permeability of homogenous-wet and mixed-wet porous media as determined by pore-scale lattice Boltzmann modeling (doi 10.1002/2013WR015148)

3690 *Qing Cao and Youcun Qi*

The variability of vertical structure of precipitation in Huaihe River Basin of China: Implications from long-term spaceborne observations with TRMM precipitation radar (doi 10.1002/2013WR014555)

3706 *T. Read, O. Bour, J. S. Selker, V. F. Bense, T. Le Borgne, R. Hochreutener, and N. Lavenant*

Active-Distributed Temperature Sensing to continuously quantify vertical flow in boreholes
(doi 10.1002/2014WR015273)

3714 *Ronald R. Gutierrez and Jorge D. Abad*

On the analysis of the medium term planform dynamics of meandering rivers (doi 10.1002/2012WR013358)

3734 *Judith Yue Li, Sivaram Ambikasaran, Eric F. Darve, and Peter K. Kitanidis*

A Kalman filter powered by \mathcal{H}^2 -matrices for quasi-continuous data assimilation problems
(doi 10.1002/2013WR014607)

3750 *Guoxiang Yang and Laura C. Bowling*

Detection of changes in hydrologic system memory associated with urbanization in the Great Lakes region (doi 10.1002/2014WR015339)

3764 *Dehua Zhao, Meiting Lv, Xiangxu Zou, Penghe Wang, Tangwu Yang, and Shuqing An*

What is the minimum river width for the estimation of water clarity using medium-resolution remote sensing images? (doi 10.1002/2013WR015068)

3776 *Birendra Jha and Ruben Juanes*

Coupled multiphase flow and poromechanics: A computational model of pore pressure effects on fault slip and earthquake triggering (doi 10.1002/2013WR015175)

3809 *Dieter W. S. A. Meire, John M. Kondziolka, and Heidi M. Nepf*

Interaction between neighboring vegetation patches: Impact on flow and deposition
(doi 10.1002/2013WR015070)

3826 *Jonathan A. Czuba and Efi Foufoula-Georgiou*

A network-based framework for identifying potential synchronizations and amplifications of sediment delivery in river basins (doi 10.1002/2013WR014227)

- 3852 *Tiantian Xiang, Enrique R. Vivoni, and David J. Gochis*
Seasonal evolution of ecohydrological controls on land surface temperature over complex terrain
(doi 10.1002/2013WR014787)
- 3875 *Jonas Luckmann, Harald Grethe, Scott McDonald, Anton Orlov, and Khalid Siddig*
An integrated economic model of multiple types and uses of water (doi 10.1002/2013WR014750)
- 3893 *Ali A. Ameli and James R. Craig*
Semianalytical series solutions for three-dimensional groundwater-surface water interaction
(doi 10.1002/2014WR015394)
- 3907 *Andreas Langousis and Vassilios Kaleris*
Statistical framework to simulate daily rainfall series conditional on upper-air predictor variables
(doi 10.1002/2013WR014936)
- 3933 *Shmuel Assouline, Kfir Narkis, Rivka Gherabli, Philippe Lefort, and Marc Prat*
Analysis of the impact of surface layer properties on evaporation from porous systems using column experiments and modified definition of characteristic length (doi 10.1002/2013WR014489)
- 3956 *Troels N. Vilhelmsen, Ahmad A. Behroozmand, Steen Christensen, and Toke H. Nielsen*
Joint inversion of aquifer test, MRS, and TEM data (doi 10.1002/2013WR014679)
- 3976 *M. P. Maneta and R. Howitt*
Stochastic calibration and learning in nonstationary hydroeconomic models (doi 10.1002/2013WR015196)
- 3994 *Roger H. Cranswick, Peter G. Cook, Margaret Shanafield, and Sebastien Lamontagne*
The vertical variability of hyporheic fluxes inferred from riverbed temperature data
(doi 10.1002/2013WR014410)
- 4011 *P. Naveau, A. Toreti, I. Smith, and E. Xoplaki*
A fast nonparametric spatio-temporal regression scheme for generalized Pareto distributed heavy precipitation (doi 10.1002/2014WR015431)
- 4018 *F. P. J. de Barros and A. Fiori*
First-order based cumulative distribution function for solute concentration in heterogeneous aquifers: Theoretical analysis and implications for human health risk assessment (doi 10.1002/2013WR015024)
- 4038 *Zulia Mayari Sanchez-Mejia, Shirley Anne Papuga, Jessica Blaine Swetish, Willem Jan Dirk van Leeuwen, Daphne Szutu, and Kyle Hartfield*
Quantifying the influence of deep soil moisture on ecosystem albedo: The role of vegetation
(doi 10.1002/2013WR014150)
- 4054 *Yoshimitsu Masaki, Naota Hanasaki, Kiyoshi Takahashi, and Yasuaki Hijikata*
Global-scale analysis on future changes in flow regimes using Gini and Lorenz asymmetry coefficients
(doi 10.1002/2013WR014266)
- 4079 *Ching-Sheng Huang, Shaw-Yang Yang, and Hund-Der Yeh*
Groundwater flow to a pumping well in a sloping fault zone unconfined aquifer
(doi 10.1002/2013WR014212)
- 4095 *Lei Chen, Yucen Zhong, Guoyuan Wei, Yanpeng Cai, and Zhenyao Shen*
Development of an integrated modeling approach for identifying multilevel non-point-source priority management areas at the watershed scale (doi 10.1002/2013WR015041)
- 4110 *Alan Richardson, Christopher N. Hill, and J. Taylor Perron*
IDA: An implicit, parallelizable method for calculating drainage area (doi 10.1002/2013WR014326)
- 4131 *Ana M. Ricardo, Katinka Koll, Mário J. Franca, Anton J. Schleiss, and Rui M. L. Ferreira*
The terms of turbulent kinetic energy budget within random arrays of emergent cylinders
(doi 10.1002/2013WR014596)
- 4149 *Bijendra M. Bajracharya, Chuanhe Lu, and Olaf A. Cirpka*
Modeling substrate-bacteria-grazer interactions coupled to substrate transport in groundwater
(doi 10.1002/2013WR015173)
- 4163 *Ana Mijic, Tara C. LaForce, and Ann H. Muggeridge*
CO₂ injectivity in saline aquifers: The impact of non-Darcy flow, phase miscibility, and gas compressibility
(doi 10.1002/2013WR014893)
- 4186 *B. Vermeulen, M. G. Sassi, and A. J. F. Hoitink*
Improved flow velocity estimates from moving-boat ADCP measurements (doi 10.1002/2013WR015152)
- 4197 *Liang Xue and Dongxiao Zhang*
A multimodel data assimilation framework via the ensemble Kalman filter (doi 10.1002/2013WR014525)

- 4220** *Michael Rona, Guy Gasser, Ido Negev, Irena Pankratov, Sara Elhanany, Ovadia Lev, and Haim Gvirtzman*
A 3-D hydrologic transport model of a water recharge system using carbamazepine and chloride as tracers (doi 10.1002/2013WR014759)
- 4242** *A. Botto, D. Ganora, F. Laio, and P. Claps*
Uncertainty compliant design flood estimation (doi 10.1002/2013WR014981)
- 4254** *Noelwah R. Netusil, Michael Kincaid, and Heejun Chang*
Valuing water quality in urban watersheds: A comparative analysis of Johnson Creek, Oregon, and Burnt Bridge Creek, Washington (doi 10.1002/2013WR014546)
- 4269** *Guy Gasser, Irena Pankratov, Sara Elhanany, Hillel Glazman, and Ovadia Lev*
Calculation of wastewater effluent leakage to pristine water sources by the weighted average of multiple tracer approach (doi 10.1002/2013WR014377)
- 4283** *Fiona J. Clubb, Simon M. Mudd, David T. Milodowski, Martin D. Hurst, and Louise J. Slater*
Objective extraction of channel heads from high-resolution topographic data (doi 10.1002/2013WR015167)
- 4305** *Martha A. Scholl and Sheila F. Murphy*
Precipitation isotopes link regional climate patterns to water supply in a tropical mountain forest, eastern Puerto Rico (doi 10.1002/2013WR014413)
- 4323** *Qiuqiong Huang*
Impact evaluation of the irrigation management reform in northern China (doi 10.1002/2013WR015192)
- 4341** *J. D. Drummond, A. F. Aubeneau, and A. I. Packman*
Stochastic modeling of fine particulate organic carbon dynamics in rivers (doi 10.1002/2013WR014665)
- 4357** *John Koestel and Mats Larsbo*
Imaging and quantification of preferential solute transport in soil macropores
 (doi 10.1002/2014WR015351)
- 4379** *Jan Martin Nordbotten*
Finite volume hydromechanical simulation in porous media (doi 10.1002/2013WR015179)
- 4395** *Urooj Khan, Narendra Kumar Tuteja, Hoori Ajami, and Ashish Sharma*
An equivalent cross-sectional basis for semidistributed hydrological modeling
 (doi 10.1002/2013WR014741)
- 4416** *Xiaoqing Shi, Ming Ye, Gary P. Curtis, Geoffery L. Miller, Philip D. Meyer, Matthias Kohler, Steve Yabusaki, and Jichun Wu*
Assessment of parametric uncertainty for groundwater reactive transport modeling
 (doi 10.1002/2013WR013755)
- 4440** *Marwan A. Hassan, Drew Brayshaw, Younes Alila, and Edmund Andrews*
Effective discharge in small formerly glaciated mountain streams of British Columbia: Limitations and implications (doi 10.1002/2013WR014529)
- 4459** *Jessica A. Reeves, Rosemary Knight, Howard A. Zebker, Peter K. Kitanidis, and Willem A. Schreüder*
Estimating temporal changes in hydraulic head using InSAR data in the San Luis Valley, Colorado
 (doi 10.1002/2013WR014938)
- 4474** *Mary E. Exner, Aaron J. Hirsh, and Roy F. Spalding*
Nebraska's groundwater legacy: Nitrate contamination beneath irrigated cropland
 (doi 10.1002/2013WR015073)
- 4490** *Michael Bliss Singer, Christopher I. Sargeant, Hervé Piégay, Jérémie Riquier, Rob J. S. Wilson, and Cristina M. Evans*
Floodplain ecohydrology: Climatic, anthropogenic, and local physical controls on partitioning of water sources to riparian trees (doi 10.1002/2014WR015581)
- 4514** *Helmut Geistlinger, Sadjad Mohammadian, Steffen Schlueter, and Hans-Joerg Vogel*
Quantification of capillary trapping of gas clusters using X-ray microtomography
 (doi 10.1002/2013WR014657)

Technical Note

- 4530** *F. Selker and J. S. Selker*
Flume testing of underwater seep detection using temperature sensing on or just below the surface of sand or gravel sediments (doi 10.1002/2014WR015257)

Opinion Article

4535 *Andrew J. Guswa, Kate A. Brauman, Casey Brown, Perrine Hamel, Bonnie L. Keeler, and Susan Stratton Sayre*

Ecosystem services: Challenges and opportunities for hydrologic modeling to support decision making

(doi 10.1002/2014WR015497)
