Research Articles

- 1859** *Colleen E. Muir, Oleg V. Petrov, Konstantin V. Romanenko, and Bruce J. Balcom*
Measuring miscible fluid displacement in porous media with magnetic resonance imaging
(doi 10.1002/2013WR013534)
- 1869** *Percy Link, Kevin Simonin, Holly Maness, Jasper Oshun, Todd Dawson, and Inez Fung*
Species differences in the seasonality of evergreen tree transpiration in a Mediterranean climate: Analysis of multiyear, half-hourly sap flow observations (doi 10.1002/2013WR014023)
- 1895** *Aryeh Fox, Fulvio Boano, and Shai Arnon*
Impact of losing and gaining streamflow conditions on hyporheic exchange fluxes induced by dune-shaped bed forms (doi 10.1002/2013WR014668)
- 1908** *T. Goulden, C. Hopkinson, R. Jamieson, and S. Sterling*
Sensitivity of watershed attributes to spatial resolution and interpolation method of LiDAR DEMs in three distinct landscapes (doi 10.1002/2013WR013846)
- 1928** *Ana Rosner, Richard M. Vogel, and Paul H. Kirshen*
A risk-based approach to flood management decisions in a nonstationary world
(doi 10.1002/2013WR014561)
- 1943** *Glenn D. Shaw, Martha H. Conklin, Gregory J. Nimz, and Fengjing Liu*
Groundwater and surface water flow to the Merced River, Yosemite Valley, California: ^{36}Cl and Cl^- evidence (doi 10.1002/2013WR014222)
- 1960** *E. J. Coopersmith, B. S. Minsker, and M. Sivapalan*
Patterns of regional hydroclimatic shifts: An analysis of changing hydrologic regimes
(doi 10.1002/2012WR013320)
- 1984** *Alfonso Mejía, Edoardo Daly, Florian Rossel, Tijana Jovanovic, and Jorge Gironás*
A stochastic model of streamflow for urbanized basins (doi 10.1002/2013WR014834)
- 2002** *Doris Duethmann, Juliane Peters, Theresa Blume, Sergiy Vorogushyn, and Andreas Güntner*
The value of satellite-derived snow cover images for calibrating a hydrological model in snow-dominated catchments in Central Asia (doi 10.1002/2013WR014382)
- 2022** *James L. McCallum, Nicholas B. Engdahl, Timothy R. Ginn, and Peter. G. Cook*
Nonparametric estimation of groundwater residence time distributions: What can environmental tracer data tell us about groundwater residence time? (doi 10.1002/2013WR014974)
- 2039** *Lisle Snyder and William B. Bowden*
Nutrient dynamics in an oligotrophic arctic stream monitored in situ by wet chemistry methods
(doi 10.1002/2013WR014317)
- 2050** *Feifei Zheng, Seth Westra, Michael Leonard, and Scott A. Sisson*
Modeling dependence between extreme rainfall and storm surge to estimate coastal flooding risk
(doi 10.1002/2013WR014616)
- 2072** *Gabriel Fink, Martin Schmid, Bernd Wahl, Thomas Wolf, and Alfred Wüest*
Heat flux modifications related to climate-induced warming of large European lakes
(doi 10.1002/2013WR014448)
- 2086** *Marc Jeuland and Dale Whittington*
Water resources planning under climate change: Assessing the robustness of real options for the Blue Nile (doi 10.1002/2013WR013705)
- 2108** *Eytan Rocheta, Michael Sugiyanto, Fiona Johnson, Jason Evans, and Ashish Sharma*
How well do general circulation models represent low-frequency rainfall variability?
(doi 10.1002/2012WR013085)

- 2124 *Nadav Peleg and Efrat Morin*
Stochastic convective rain-field simulation using a high-resolution synoptically conditioned weather generator (HiReS-WG)* (doi 10.1002/2013WR014836)
***This article is part of a Special Section—Eco-hydrology of Semiarid Environments: Confronting Mathematical Models with Ecosystem Complexity**
- 2140 *Elmar Strobach, B. D. Harris, J. C. Dupuis, and A. W. Kopic*
Time-lapse borehole radar for monitoring rainfall infiltration through podosol horizons in a sandy vadose zone (doi 10.1002/2013WR014331)
- 2164 *Zhe Liu, Urooj Khan, and Ashish Sharma*
A new method for verification of delineated channel networks (doi 10.1002/2013WR014290)
- 2176 *Tsegaye Tadesse, Getachew Berhan Demisse, Ben Zaitchik, and Tufa Dinku*
Satellite-based hybrid drought monitoring tool for prediction of vegetation condition in Eastern Africa: A case study for Ethiopia* (doi 10.1002/2013WR014281)
***This article is part of a Special Section—Climate, Hydrology and Water Resources of Eastern Africa**
- 2191 *F. W. Platzek, G. S. Stelling, J. A. Jankowski, and J. D. Pietrzak*
Accurate vertical profiles of turbulent flow in z-layer models (doi 10.1002/2013WR014411)
- 2212 *W. W. Immerzeel, L. Petersen, S. Ragetti, and F. Pellicciotti*
The importance of observed gradients of air temperature and precipitation for modeling runoff from a glacierized watershed in the Nepalese Himalayas (doi 10.1002/2013WR014506)
- 2227 *K. G. Heays, H. Friedrich, and B. W. Melville*
Laboratory study of gravel-bed cluster formation and disintegration (doi 10.1002/2013WR014208)
- 2242 *Behzad Ghanbarian and Allen G. Hunt*
Universal scaling of gas diffusion in porous media (doi 10.1002/2013WR014790)
- 2257 *Kevin B. Mulligan, Casey Brown, Yi-Chen E. Yang, and David P. Ahlfeld*
Assessing groundwater policy with coupled economic-groundwater hydrologic modeling (doi 10.1002/2013WR013666)
- 2276 *Ping Wang and Sergey P. Pozdniakov*
A statistical approach to estimating evapotranspiration from diurnal groundwater level fluctuations (doi 10.1002/2013WR014251)
- 2293 *Sachin Karan, Peter Engesgaard, and Jørn Rasmussen*
Dynamic streambed fluxes during rainfall-runoff events (doi 10.1002/2013WR014155)
- 2312 *Hyunuk An and Soonyoung Yu*
Finite volume integrated surface-subsurface flow modeling on nonorthogonal grids (doi 10.1002/2013WR013828)
- 2329 *Marc Schleiss, Sabine Chamoun, and Alexis Berne*
Stochastic simulation of intermittent rainfall using the concept of “dry drift” (doi 10.1002/2013WR014641)
- 2350 *Guillaume Evin, Mark Thyer, Dmitri Kavetski, David McInerney, and George Kuczera*
Comparison of joint versus postprocessor approaches for hydrological uncertainty estimation accounting for error autocorrelation and heteroscedasticity (doi 10.1002/2013WR014185)
- 2376 *Natalie D. Beckman and Ellen Wohl*
Carbon storage in mountainous headwater streams: The role of old-growth forest and logjams (doi 10.1002/2013WR014167)
- 2394 *E. Bresciani, P. Davy, and J.-R. de Dreuzy*
Is the Dupuit assumption suitable for predicting the groundwater seepage area in hillslopes? (doi 10.1002/2013WR014284)
- 2407 *M. O. Cuthbert*
Straight thinking about groundwater recession (doi 10.1002/2013WR014060)
- 2425 *Christopher T. Green, Barbara A. Bekins, Stephen J. Kalkhoff, Robert M. Hirsch, Lixia Liao, and Kimberlee K. Barnes*
Decadal surface water quality trends under variable climate, land use, and hydrogeochemical setting in Iowa, USA (doi 10.1002/2013WR014829)
- 2444 *M. E. Gharamti, A. Kadoura, J. Valstar, S. Sun, and I. Hoteit*
Constraining a compositional flow model with flow-chemical data using an ensemble-based Kalman filter (doi 10.1002/2013WR014830)

- 2468 *Klaus Haslinger, Daniel Koffler, Wolfgang Schöner, and Gregor Laaha*
Exploring the link between meteorological drought and streamflow: Effects of climate-catchment interaction (doi 10.1002/2013WR015051)
- 2488 *Yashar Mehmani, Mart Oostrom, and Matthew T. Balhoff*
A streamline splitting pore-network approach for computationally inexpensive and accurate simulation of transport in porous media (doi 10.1002/2013WR014984)
- 2518 *YoonKyung Cha, Seok Soon Park, Kyunghyun Kim, Myeongseop Byeon, and Craig A. Stow*
Probabilistic prediction of cyanobacteria abundance in a Korean reservoir using a Bayesian Poisson model (doi 10.1002/2013WR014372)
- 2533 *Stefan Pohl, Jakob Garvelmann, Jens Wawerla, and Markus Weiler*
Potential of a low-cost sensor network to understand the spatial and temporal dynamics of a mountain snow cover (doi 10.1002/2013WR014594)
- 2551 *Tajdarul H. Syed, Peter J. Webster, and James S. Famiglietti*
Assessing variability of evapotranspiration over the Ganga river basin using water balance computations (doi 10.1002/2013WR013518)
- 2566 *Steven B. Meyerhoff, Reed M. Maxwell, André Revil, Jonathan B. Martin, Marios Karaoulis, and Wendy D. Graham*
Characterization of groundwater and surface water mixing in a semiconfined karst aquifer using time-lapse electrical resistivity tomography (doi 10.1002/2013WR013991)
- 2586 *Luigi Berardi, Rita Ugarelli, Jon Røstum, and Orazio Giustolisi*
Assessing mechanical vulnerability in water distribution networks under multiple failures (doi 10.1002/2013WR014770)
- 2600 *Laura E. Condon and Reed M. Maxwell*
Feedbacks between managed irrigation and water availability: Diagnosing temporal and spatial patterns using an integrated hydrologic model* (doi 10.1002/2013WR014868)
- *This article is part of a Special Section—Patterns in Soil-Vegetation-Atmosphere Systems: Monitoring, Modelling and Data Assimilation**
- 2617 *Marilena Pannone*
Predictability of tracer dilution in large open channel flows: Analytical solution for the coefficient of variation of the depth-averaged concentration (doi 10.1002/2013WR013986)
- 2636 *Hoori Ajami, Matthew F. McCabe, Jason P. Evans, and Simon Stisen*
Assessing the impact of model spin-up on surface water-groundwater interactions using an integrated hydrologic model (doi 10.1002/2013WR014258)
- 2657 *Hedeff I. Essaid and Barry R. Hill*
Watershed-scale modeling of streamflow change in incised montane meadows (doi 10.1002/2013WR014420)
- 2679 *Gholamreza Joodaki, John Wahr, and Sean Swenson*
Estimating the human contribution to groundwater depletion in the Middle East, from GRACE data, land surface models, and well observations (doi 10.1002/2013WR014633)
- 2693 *Huan Wu, Robert F. Adler, Yudong Tian, George J. Huffman, Hongyi Li, and JianJian Wang*
Real-time global flood estimation using satellite-based precipitation and a coupled land surface and routing model (doi 10.1002/2013WR014710)
- 2718 *Jason E. Heath, Charles R. Bryan, Edward N. Matteo, Thomas A. Dewers, Yifeng Wang, and Cédric J. Sallaberry*
Adsorption and capillary condensation in porous media as a function of the chemical potential of water in carbon dioxide (doi 10.1002/2013WR013728)
- 2732 *Christian von Hebel, Sebastian Rudolph, Achim Mester, Johan A. Huisman, Pramod Kumbhar, Harry Vereecken, and Jan van der Kruk*
Three-dimensional imaging of subsurface structural patterns using quantitative large-scale multiconfiguration electromagnetic induction data* (doi 10.1002/2013WR014864)
- *This article is part of a Special Section—Patterns in Soil-Vegetation-Atmosphere Systems: Monitoring, Modelling and Data Assimilation**

Data and Analysis Note

- 2749** *A. A. Harpold, Q. Guo, N. Molotch, P. D. Brooks, R. Bales, J. C. Fernandez-Diaz, K. N. Musselman, T. L. Swetnam, P. Kirchner, M. W. Meadows, J. Flanagan, and R. Lucas*
LiDAR-derived snowpack data sets from mixed conifer forests across the Western United States
(doi 10.1002/2013WR013935)

Commentaries

- 2756** *James C. Bathurst*
Comment on “A paradigm shift in understanding and quantifying the effects of forest harvesting on floods in snow environments” by K. C. Green and Y. Alila (doi 10.1002/2013WR013613)
- 2759** *Younes Alila and Kim C. Green*
Reply to comment by Bathurst on “A paradigm shift in understanding and quantifying the effects of forest harvesting on floods in snow environments” (doi 10.1002/2013WR014334)
- 2765** *Stephen J. Birkinshaw*
Comment on “A paradigm shift in understanding and quantifying the effects of forest harvesting on floods in snow environments” by Kim C. Green and Younes Alila (doi 10.1002/2013WR013586)
- 2769** *Younes Alila and Kim C. Green*
Reply to comment by Birkinshaw on “A paradigm shift in understanding and quantifying the effects of forest harvesting on floods in snow environments” (doi 10.1002/2013WR014198)
- 2775** *Wei Chu, Tiantian Yang, and Xiaogang Gao*
Comment on “High-dimensional posterior exploration of hydrologic models using multiple-try DREAM (ZS) and high-performance computing” by Eric Laloy and Jasper A. Vrugt (doi 10.1002/2012WR013341)
- 2781** *Jasper A. Vrugt and Eric Laloy*
Reply to comment by Chu et al. on “High-dimensional posterior exploration of hydrologic models using multiple-try DREAM (ZS) and high-performance computing” (doi 10.1002/2013WR014425)
