Editorial

- 2787 *Alberto Montanari*
Water Resources Research in 2013 (doi 10.1002/2014WR015648)

Joint Editorial

- 2795 *Günter Blöschl, András Bárdossy, Demetris Koutsoyiannis, Zbigniew W. Kundzewicz, Ian Littlewood, Alberto Montanari, and Hubert Savenije*
On the future of journal publications in hydrology (doi 10.1002/2014WR015613)

Research Articles

- 2798 *Nicholas A. Povak, Paul F. Hessburg, Todd C. McDonnell, Keith M. Reynolds, Timothy J. Sullivan, R. Brion Salter, and Bernard J. Cosby*
Machine learning and linear regression models to predict catchment-level base cation weathering rates across the southern Appalachian Mountain region, USA (doi 10.1002/2013WR014203)
- 2815 *Andrew M. McCallum, Martin S. Andersen, Gabriel C. Rau, Joshua R. Larsen, and R. Ian Acworth*
River-aquifer interactions in a semiarid environment investigated using point and reach measurements* (doi 10.1002/2012WR012922)
***This article is part of a Special Section—New Modelling Approaches and Novel Experimental Technologies for Improved Understanding of Process Dynamics at Aquifer-Surface Water Interfaces**
- 2830 *Marco Pilotti, Stefano Simoncelli, and Giulia Valerio*
A simple approach to the evaluation of the actual water renewal time of natural stratified lakes (doi 10.1002/2013WR014471)
- 2850 *Nicolas Claude, Stéphane Rodrigues, Vincent Bustillo, Jean-Gabriel Bréhéret, Pablo Tassi, and Philippe Jugé*
Interactions between flow structure and morphodynamic of bars in a channel expansion/contraction, Loire River, France (doi 10.1002/2013WR015182)
- 2874 *A. C. Lute and J. T. Abatzoglou*
Role of extreme snowfall events in interannual variability of snowfall accumulation in the western United States (doi 10.1002/2013WR014465)
- 2889 *P. Ramamurthy and E. Bou-Zeid*
Contribution of impervious surfaces to urban evaporation* (doi 10.1002/2013WR013909)
***This article is part of a Special Section—Hydrologic Discovery Through Physical Analysis Honoring the Scientific Legacies of W. Brutsaert and J.-Y. Parlange**
- 2903 *Serena Ceola, Enrico Bertuzzo, Gabriel Singer, Tom J. Battin, Alberto Montanari, and Andrea Rinaldo*
Hydrologic controls on basin-scale distribution of benthic invertebrates (doi 10.1002/2013WR015112)
- 2921 *Bwalya Malama*
Theory of transient streaming potentials in coupled unconfined aquifer-unsaturated zone flow to a well (doi 10.1002/2013WR014909)
- 2946 *Kurt C. Kornelsen and Paulin Coulibaly*
Root-zone soil moisture estimation using data-driven methods (doi 10.1002/2013WR014127)
- 2963 *G. Mariotti and J. Carr*
Dual role of salt marsh retreat: Long-term loss and short-term resilience (doi 10.1002/2013WR014676)
- 2975 *Ganming Liu and Franklin W. Schwartz*
On modeling the paleohydrologic response of closed-basin lakes to fluctuations in climate: Methods, applications, and implications (doi 10.1002/2013WR014107)

- 2993 *T. J. Peterson and A. W. Western*
Multiple hydrological attractors under stochastic daily forcing: 1. Can multiple attractors exist?*
 (doi 10.1002/2012WR013003)
***Companion to Peterson et al. [2014] doi:10.1002/2012WR013004**
- 3010 *T. J. Peterson, A. W. Western, and R. M. Argent*
Multiple hydrological attractors under stochastic daily forcing: 2. Can multiple attractors emerge?*
 (doi 10.1002/2012WR013004)
***Companion to Peterson and Western [2014] doi:10.1002/2012WR013003**
- 3030 *Jingshi Tang, Haowen Cheng, and Lin Liu*
Assessing the recent droughts in Southwestern China using satellite gravimetry
 (doi 10.1002/2013WR014656)
- 3039 *Keita F. DeCarlo and Nima Shokri*
Effects of substrate on cracking patterns and dynamics in desiccating clay layers*
 (doi 10.1002/2013WR014466)
***This article is part of a Special Section—Patterns in Soil-Vegetation-Atmosphere Systems: Monitoring, Modelling and Data Assimilation**
- 3052 *Keita F. DeCarlo and Nima Shokri*
Salinity effects on cracking morphology and dynamics in 3-D desiccating clays
 (doi 10.1002/2013WR014424)
- 3073 *Han Li, Xinwei Deng, Dong-Yun Kim, and Eric P. Smith*
Modeling maximum daily temperature using a varying coefficient regression model
 (doi 10.1002/2013WR014243)
- 3088 *K. Mahmud, G. Mariethoz, J. Caers, P. Tahmasebi, and A. Baker*
Simulation of Earth textures by conditional image quilting (doi 10.1002/2013WR015069)
- 3108 *Dominique R. Bourdin, Thomas N. Nipen, and Roland B. Stull*
Reliable probabilistic forecasts from an ensemble reservoir inflow forecasting system
 (doi 10.1002/2014WR015462)
- 3131 *Anh Phuong Tran, Marnik Vanclooster, Milija Zupanski, and Sébastien Lambot*
Joint estimation of soil moisture profile and hydraulic parameters by ground-penetrating radar data assimilation with maximum likelihood ensemble filter (doi 10.1002/2013WR014583)
- 3147 *Xin He, Julian Koch, Torben O. Sonnenborg, Flemming Jørgensen, Cyril Schamper, and Jens Christian Refsgaard*
Transition probability-based stochastic geological modeling using airborne geophysical data and borehole data* (doi 10.1002/2013WR014593)
***This article is part of a Special Section—Patterns in Soil-Vegetation-Atmosphere Systems: Monitoring, Modelling and Data Assimilation**
- 3170 *Chunqiao Song, Bo Huang, Keith Richards, Linghong Ke, and Vu Hien Phan*
Accelerated lake expansion on the Tibetan Plateau in the 2000s: Induced by glacial melting or other processes? (doi 10.1002/2013WR014724)
- 3187 *A. Kokkinaki, C. J. Werth, and B. E. Sleep*
Comparison of upscaled models for multistage mass discharge from DNAPL source zones
 (doi 10.1002/2013WR014663)
- 3206 *Wilfried Brutsaert*
Daily evaporation from drying soil: Universal parameterization with similarity
 (doi 10.1002/2013WR014872)
- 3216 *Zhongmin Liang, Yiming Hu, Binqun Li, and Zhongbo Yu*
A modified weighted function method for parameter estimation of Pearson type three distribution
 (doi 10.1002/2013WR013653)
- 3229 *Luis A. Méndez-Barroso, Enrique R. Vivoni, Agustin Robles-Morua, Giuseppe Mascaro, Enrico A. Yépez, Julio C. Rodríguez, Christopher J. Watts, Jaime Garatuza-Payán, and Juan A. Saíz-Hernández*
A modeling approach reveals differences in evapotranspiration and its partitioning in two semiarid ecosystems in Northwest Mexico* (doi 10.1002/2013WR014838)
***This article is part of a Special Section—Eco-hydrology of Semiarid Environments: Confronting Mathematical Models with Ecosystem Complexity**

- 3253 Barret L. Kurylyk, Kerry T. B. MacQuarrie, and Clifford I. Voss
Climate change impacts on the temperature and magnitude of groundwater discharge from shallow, unconfined aquifers (doi 10.1002/2013WR014588)
- 3275 Simone Fatichi and Valeriy Y. Ivanov
Interannual variability of evapotranspiration and vegetation productivity* (doi 10.1002/2013WR015044)
***This article is part of a Special Section—Eco-hydrology of Semiarid Environments: Confronting Mathematical Models with Ecosystem Complexity**
- 3295 Bidroha Basu and V. V. Srinivas
Regional flood frequency analysis using kernel-based fuzzy clustering approach
 (doi 10.1002/2012WR012828)
- 3317 M. Lafaysse, B. Hingray, A. Mezghani, J. Gailhard, and L. Terray
Internal variability and model uncertainty components in future hydrometeorological projections: The Alpine Durance basin (doi 10.1002/2013WR014897)
- 3342 A. Bargaés Tobella, H. Reese, A. Almaw, J. Bayala, A. Malmer, H. Laudon, and U. Ilstedt
The effect of trees on preferential flow and soil infiltrability in an agroforestry parkland in semiarid Burkina Faso* (doi 10.1002/2013WR015197)
***This article is part of a Special Section—Eco-hydrology of Semiarid Environments: Confronting Mathematical Models with Ecosystem Complexity**
- 3355 M. Giuliani, J. D. Herman, A. Castelletti, and P. Reed
Many-objective reservoir policy identification and refinement to reduce policy inertia and myopia in water management (doi 10.1002/2013WR014700)
- 3378 Kai Schröter, Heidi Kreibich, Kristin Vogel, Carsten Riggelsen, Frank Scherbaum, and Bruno Merz
How useful are complex flood damage models? (doi 10.1002/2013WR014396)
- 3396 Richard D. Crago and Russell J. Qualls
Use of land surface temperature to estimate surface energy fluxes: Contributions of Wilfried Brutsaert and collaborators (doi 10.1002/2013WR015223)
