### **SPECIAL ISSUE: A CROSSCUTTING AND COMPREHENSIVE LOOK AT ENVIRONMENTAL PROBLEMS (PART 2)**

**Guest Editors: Dr. Rosa María Torres Sánchez  
and Professor Maria dos Santos Afonso**

- 1      **Preface**  
*Rosa María Torres Sánchez and Maria dos Santos Afonso*
- 3      **Biocatalysed acidification and metal leaching processes in sediments  
of polluted urban streams**  
*Natalia Florencia Porzionato, Roberto Candal and Gustavo Curutchet*
- 15     **Water decontamination by silver and copper montmorillonite**  
*J. Lamarra, M.A. Fernández, J. Pascual Cosp, S. de la Fournière, G. Garbossa  
and R.M. Torres Sánchez*
- 31     **Arsenic biotransference to alfalfa (*Medicago sativa*)**  
*Alejo Pérez-Carrera and Alicia Fernández-Cirelli*
- 41     **Mechanisms of arsenic and fluoride release from Chacopampean  
sediments (Argentina)**  
*M.G. García, L. Borgnino, G. Bia and P.J. Depetris*
- 58     **Dynamic laser speckle and fuzzy mathematical morphology applied to  
studies of chemotaxis towards hydrocarbons**  
*Melina Nisenbaum, Agustina Bouchet, Marcelo Nicolás Guzmán,  
Jorge Froilán González, Gonzalo Hernán Sendra, Juan Ignacio Pastore,  
Marcelo Trivi and Silvia Elena Murialdo*
- 70     **Effect of the surfactant benzalkonium chloride in the sorption of paraquat  
and cadmium on montmorillonite**  
*Romina Ilari, Mariana Etcheverry, Cristina Zenobi and Graciela Zanini*
- 83     ***Asterococcus superbis* as a biosorbent of copper, zinc, cadmium and lead:  
adsorption isotherm and kinetic modelling**  
*María Mar Areco*
