On the cover:

Vietnam's shrimp farmers, who operate from family to factory scale, collectively produce annual shrimp harvests worth over U.S. \$3 billion.

Page 22

Better Feed, Better Performance

Since better feeds produce less waste materials, they also result in improved water quality that indirectly improves shrimp performance.

Page 72

Polychaete Worms

Adaptable and diverse, polychaete worms can reduce particulate matter in culture water and also provide a source of amino acids in feed.
