

Animal Science

A special issue in honor of Professor Odd Vangen

CONTENTS

1 Editorial

ORIGINAL ARTICLES

- 2 Approaches to formulating practical breeding objectives for animal production systems
H.M. Nielsen, P.R. Amer and T.J. Byrne
- 13 Application of aggregate genotype in beef cattle breeding
B.A. Åby, E. Sehested, M. Holtsmark, L. Aass and O. Vangen
- 23 Transformation from dairy to suckling system: An opportunity or a disaster for local dual purpose cattle breeds
E. Martyniuk, N. Sæther, B. Berger and J. Krupiński
- 36 Practical aspects of genetic management of small populations – The Olkuska sheep example
W. Drobik and E. Martyniuk
- 49 Improvement in the national genetic evaluation of warmblood riding horses by including information from related studbooks
S. Furre, Å. Viklund, B. Heringstad, J. Philipsson and O. Vangen
- 57 Genetic connections between dressage and show-jumping horses in Dutch Warmblood horses
G. Rovere, P. Madsen, E. Norberg, J.A.M. Van Arendonk and B.J. Ducro
- 67 Shoulder ulcers in sows are genetically correlated to leanness of young pigs and to litter weight
N. Lundeheim, H. Lundgren and L. Rydhmer
