

Review

Review: Genetics of helminth resistance in sheep

N. A. Karrow, K. Goliboski, N. Stonos,
F. Schenkel, and A. Peregrine 1–9

Welfare, Behaviour and Management

Effect of frequency of feed delivery on the feeding behaviour, growth, and rumen temperature of limit-fed dairy heifers

A. M. Greter, O. AlZahal, T. F. Duffield, B. W. McBride,
T. M. Widowski, and T. J. DeVries 11–20

SHORT COMMUNICATION: Automated assessment of the effect of flunixin meglumine on rumination in dairy cows with endotoxin-induced mastitis

N. Chapinal, C. E. Fitzpatrick, K. E. Leslie,
and S. A. Wagner 21–25

Breeding and Genetics

Molecular cloning, recombinant protein expression, tissue distribution and functional analysis of a new c-type lysozyme from Lezhi black goat rumen

P. Zhang, Y. Wang, M. Jiang, L. Zhu, J. Li,
M. Luo, H. Ren, and L. Liu 27–34

Isolate[®] and Optiprep[®] minigradients as alternatives for sperm selection in bovine in vitro embryo production

L. L. Vianna, J. Pradieé, E. C. S. Santos,
A. O. Gonçalves, L. F. M. Pfeifer, M. G. T. Rheingantz,
M. A. N. Dode, A. D. Vieira, V. F. H. Lima,
M. N. Correa, and L. M. C. Pegoraro 35–42

Growth and Development

Levamisole stimulates proliferation of circulating and intestinal immune cell subsets, gut health and performance in weaned pigs

H. Valpotić, M. Šperanda, A. Kovšca-Janjatović,
M. Đidara, G. Lacković, F. Božić, B. Habrun,
S. Srećec, M. Mataušić-Pišl, and I. Valpotić 43–53

Meat Science

The relation of carcass physiological maturity to meat quality in the Canadian Bison Grading System

Ó. López-Campos, J. L. Aalhus, J. Galbraith, I. L. Larsen,
M. Juárez, B. Uttaro, and W. M. Robertson 55–62

Effect of multiple vacuum packs on colour development and stability in beef steaks

C. Avilés, M. Juárez, I. L. Larsen,
A. Rodas-González, and J. L. Aalhus 63–69

Effects of transport time and location within truck on skin bruises and meat quality of market weight pigs in two seasons

M. B. Scheeren, H. W. Gonyou, J. Brown,
A. V. Weschenfelder, and L. Faucitano 71–78

Modelling Animal Systems

Bootstrapped neural network models for analyzing the responses of broiler chicks to dietary protein and branched chain amino acids

A. Faridi, A. Golian, A. Heravi Mousavi,
and J. France 79–85

Nonruminant Nutrition

Antioxidant status and inflammatory response in weanling piglets fed diets supplemented with arginine and zinc

N. Bergeron, C. Robert, and F. Guay 87–97

Chemical composition and biological value of proteins of the yeast *Yarrowia lipolytica* growing on industrial glycerol

B. Michalik, W. Biel, R. Lubowicki,
and E. Jacyno 99–104

Intestinal morphology and activity of digestive enzymes in broilers fed crude propolis

C. R. A. Duarte, C. Eyng, A. E. Murakami,
and T. C. Santos 105–114

SHORT COMMUNICATION: Effect of dietary lysine content and sanitation conditions on performance of weaned pigs fed antibiotic-free diets

R. K. Kahindi, J. K. Htoo, and C. M. Nyachoti 115–118

Ruminant Nutrition

Whole-farm budgets of phosphorus and potassium on dairy farms in Manitoba

J. C. Plaizier, G. Legesse, K. H. Ominski,
and D. Flaten 119–128

Effects of replacing barley grain with graded levels of wheat bran on rumen fermentation, voluntary intake and nutrient digestion in beef cattle

A. D. Friedt, T. A. McAllister, M. L. He,
G. B. Penner, and J. J. McKinnon 129–137

Evaluation of mineral status in high dietary sulfur exposed or sulfur-induced polioencephalomalacia affected beef cattle

S. Amat, J. J. McKinnon, G. B. Penner,
E. Simko, and S. Hendrick 139-149

SHORT COMMUNICATION: Effects of feeding Falcon or Tyto whole plant barley silage on milk production and feed efficiency

M. Oba and M. L. Swift 151-153

Other

Greenhouse gas emissions intensity of Ontario milk production in 2011 compared with 1991

S. Jayasundara and C. Wagner-Riddle 155-173

Abstracts 175-222
