

## >> Research Reports

### Cultivation Physiology

- 363** Photosystem II Photochemical Efficiency and Photosynthetic Capacity in Leaves of Tea Plant (*Camellia sinensis* L.) under Winter Stress in the Field  
| Soonja Oh and Seok Chan Koh
- 372** Partial Defoliation and Runner Removal Affect Runnering, Fruiting, Leaf Photosynthesis and Root Growth in 'Toyonoka' Strawberries for Subtropical Winter Production  
| Chia-Bin Lyu, Wen-Ju Yang, and Kuo-Tan Li
- 380** Breaking Bud Dormancy in *Erythronium japonicum* Decne. (Liliaceae) by Natural and Artificial Chilling  
| Shin Young Kim, Seung Youn Lee, Yong Ha Rhie, and Ki Sun Kim
- 387** Effects of Photosynthetic Photon Flux and Carbon Dioxide Concentration on the Photosynthesis and Growth of Grafted Pepper Transplants during Healing and Acclimatization  
| Yoonah Jang, Boheum Mun, Kyungran Do, Yeongcheol Um, and Changhoo Chun
- 397** Leakage of Inorganic Compounds from Artificially-aged Radish (*Raphanus sativus* L.) and Chinese Cabbage (*Brassica rapa* ssp. *pekinensis*) Seeds and Use of Phosphate Leakage from Single Seed as a Tool for Assessing Viability  
| Tai Gi Min and Ba Reun Hong

### Postharvest Technology

- 404** Effects of 1-MCP on Softening, Yellowing and H<sub>2</sub>O<sub>2</sub> Content in Post-harvest 'Jingbaili' Pear Fruit during and after Cold Storage  
| Yu Dong, Liqin Liu, Yingying Zhang, and Junfeng Guan

### Genetics and Breeding

- 410** Volatiles Emitted from Single Flower Buds of a *Lilium longiflorum* × *L. callosum* Interspecific Hybrid and Its Parents  
| Ji Hee Kim, Mark S. Roh, Joseph C. Dickens, Ae Kyung Lee, and Jeung Keun Suh
- 415** Gene Expression and Phenotypic Analyses of Transgenic Chinese Cabbage Over-expressing the Cold Tolerance Gene, *BrCSR*  
| Jae-Gyeong Yu, Gi-Ho Lee, Sang-Choon Lee, and Young-Doo Park
- 423** Identification of *Ligustrum* Seedlings Based on Sequence Analysis of an Internal Transcribed Spacer  
| Sang Hoon Ma, Gianluca Burchi, Jeung Keun Suh, Mark S. Roh, and Young Hee Joung

### Tissue Culture/Biotechnology

- 428** Effect of Silicate Source on Growth of the *Lsi2* Transgenic Plants of Chrysanthemum 'Brighton'  
| Ju Yeon Song and Byoung Ryong Jeong
