

Contents

Editorial

- Recent trends and future strategies in soil ecological research—Integrative approaches at Pedobiologia**
Jeff R. Powell, Dylan Craven, Nico Eisenhauer _____ 1

Review Article

- Ionizing radiation effects on soil biota: Application of lessons learned from Chernobyl accident for radioecological monitoring**
Andrei S. Zaitsev, Konstantin B. Gongalsky, Taizo Nakamori, Nobuhiro Kaneko _____ 5

Original Articles

- Molecular phylogenetic analysis of a novel strain from *Neelipleona* enriches *Wolbachia* diversity in soil biota**
Viola Tanganelli, Pietro Paolo Fanciulli, Francesco Nardi, Francesco Frati _____ 15

- Food sources of early colonising arthropods: The importance of allochthonous input**
María Ingimarsdóttir, Anders Michelsen, Jörgen Ripa, Katarina Hedlund _____ 21

- Cryptic diversity in the well-studied terrestrial worm *Cognettia sphagnetorum* (Clitellata: Enchytraeidae)**
Svante Martinsson, Christer Erséus _____ 27

- Complementarity among sampling methods for harvestman assemblages**
Ana Lúcia Tourinho, Larissa de Souza Lança, Fabricio Beggiato Baccaro, Sidclay Calaça Dias _____ 37

- Contribution of anecic earthworms to biopore formation during cultivation of perennial ley crops**
Timo Kautz, Marcel Lüsebrink, Stefan Pätzold, Doris Vetterlein, Ralf Pude, Miriam Athmann, Paul M. Küpper, Ute Perkons, Ulrich Köpke _____ 47

Short Communications

- The effect of pH and calcium on copper availability to the springtail *Folsomia candida* in simplified soil solutions**
Masoud M. Ardestani, Cornelis A.M. van Gestel _____ 53

- Some plants like it warmer: Increased growth of three selected invasive plant species in soils with a history of experimental warming**
Madhav Prakash Thakur, Peter B. Reich, William C. Eddy, Artur Stefanski, Roy Rich, Sarah E. Hobbie, Nico Eisenhauer _____ 57
