

## Review

### Review: Practical concepts on short dry period management

D. E. Santschi and D. M. Lefebvre 381–390

## Breeding and Genetics

### Monochromatic light affects the development of chick embryo liver via an anti-oxidation pathway involving melatonin and the melatonin receptor Mel1c

T. Wang, Z. Wang, J. Cao, Y. Dong, and Y. Chen 391–400

### Effects of parity, age at calving and stage of lactation on fatty acid composition of milk in Canadian Holsteins

G. Bilal, R. I. Cue, A. F. Mustafa, and J. F. Hayes 401–410

### Comparison of *MUC1* variable number tandem repeat polymorphisms in three yak breeds/populations

J. Gao, Z.-R. Jiang, X. Liu, Y.-H. Zhao, L. Huang, H.-Y. Peng, D. Zedan, S.-Y. Jin, and Y.-C. Zheng 411–416

## Cellular and Molecular Biology

### Effects of microRNA-mediated IGF-1 gene silencing on telomerase activity and cell proliferation in deer antler cells

W. Hu, T. Li, M. Li, L. Wu, X. Meng, and Y. Tian 417–425

### Strain screening for lowering immune activity of $\beta$ -conglycinin in defatted whole soybean flour through fermentation

N. Bao, G. Qin, P. Zhang, Y. Zhao, Z. Sun, and L. Pan 427–436

## Growth and Development

### Estimation du poids du fœtus de la chèvre sahélienne à partir des mesures échographiques des paramètres fœtaux

M. Zongo, I. Traoré, W. Pitala, H. Boly, D. Sanou, M. M. Ababneh, R. Belemtougri, et L. Sawadogo 437–443

## Meat Science

### Discrimination of beef dark cutters using visible and near infrared reflectance spectroscopy

N. Prieto, Ó. López-Campos, R. T. Zijlstra, B. Uttaro, and J. L. Aalhus 445–454

### SHORT COMMUNICATION: Influence of some meat quality parameters on beef tenderness

R. R. Tullio, M. Juárez, I. L. Larsen, J. A. Basarab, and J. L. Aalhus 455–458

### SHORT COMMUNICATION: Quality of ewe and goat meat cured product *mantas*. An approach to provide value added to culled animals

A. F. Oliveira, S. Rodrigues, A. Leite, K. Paulos, E. Pereira, and A. Teixeira 459–462

## Modelling Animal Systems

### Whole-farm greenhouse gas emissions from a backgrounding beef production system using an observation-based and model-based approach

A. A. Stewart, A. W. Alemu, K. H. Ominski, C. H. Wilson, D. G. Tremorin, K. M. Wittenberg, M. Tenuta, and H. H. Janzen 463–477

## Nonruminant Nutrition

### Comparison of casein and whey in diets on performance, immune responses and metabolomic profile of weanling pigs challenged with *Escherichia coli* F4

S. Sugiharto, B. B. Jensen, M. S. Hedemann, and C. Lauridsen 479–491

### Performance and bone characteristics of growing pigs fed diets marginally deficient in available phosphorus and a novel microbial phytase

T. T. Santos, C. L. Walk, P. Wilcock, G. Cordero, and J. Chewning 493–497

## ***Ruminant Nutrition***

**Characterization and evaluation of residual feed intake measured in mid- to late-gestation mature beef cows and relationships with circulating serum metabolites and linear body measurements**

K. M. Wood, Y. R. Montanholi, C. F. Fitzsimmons,  
S. P. Miller, B. W. McBride, and  
K. C. Swanson 499–508

**Improving the prediction of methane production and representation of rumen fermentation for finishing beef cattle within a mechanistic model**

J. L. Ellis, J. Dijkstra, A. Bannink, E. Kebreab,  
S. Archibeque, C. Benchaar, K. A. Beauchemin,  
J. D. Nkrumah, and J. France 509–524

**Evaluation of feeding corn or wheat dried distillers' grains with solubles on animal health of finishing feedlot steers**

S. Amat, J. J. McKinnon, E. Simko,  
and S. Hendrick 525–531

**Blended by-product feed pellets for backgrounding cattle**

M. G. Zenobi, H. A. Lardner, P. G. Jefferson,  
and J. J. McKinnon 533–543
