

# Food Additives & Contaminants: Part A

Volume 31

Number 3

March 2014

## Contents

### Foreword

*A. Ariosti* 341

### Articles

- Development of an antimicrobial material based on a nanocomposite cellulose acetate film for active food packaging  
*F.J. Rodríguez, A. Torres, Á. Peñalosa, H. Sepúlveda, M.J. Galotto, A. Guarda and J. Bruna* 342
- Use of nanoclay platelets in food packaging materials: technical and cytotoxicity approach  
*M. Jorda-Beneyto, N. Ortuño, A. Devis, S. Aucejo, M. Puerto, D. Gutiérrez-Praena, J. Houtman, S. Pichardo, S. Maisanaba and A. Jos* 354
- Development of an active food packaging system with antioxidant properties based on green tea extract  
*D. Carrizo, G. Gullo, O. Bosetti and C. Nerin* 364
- Trends in the use of natural antioxidants in active food packaging: a review  
*A. Sanches-Silva, D. Costa, T.G. Albuquerque, G.G. Buonocore, F. Ramos, M.C. Castilho, A.V. Machado and H.S. Costa* 374
- Sustainable (food) packaging – an overview  
*D.A.M. Russell* 396
- Bio-based coatings as potential barriers to chemical contaminants from recycled paper and board for food packaging  
*V. Guazzotti, A. Marti, L. Piergiovanni and S. Limbo* 402
- Assessing the safety of co-exposure to food packaging migrants in food and water using the maximum cumulative ratio and an established decision tree  
*P. Price, R. Zaleski, H. Hollnagel, H. Ketelslegers and X. Han* 414
- A novel safety assessment strategy for non-intentionally added substances (NIAS) in carton food contact materials  
*S. Koster, M. Rennen, W. Lee-man, G. Houben, B. Muilwijk, F. van Acker and L. Krul* 422
- Development of a new modelling tool (FACET) to assess exposure to chemical migrants from food packaging  
*P.K.T. Oldring, C. O'Mahony, J. Dixon, M. Vints, J. Mehegan, C. Dequatre and L. Castle* 444
- Estimates of dietary exposure to bisphenol A (BPA) from light metal packaging using food consumption and packaging usage data: a refined deterministic approach and a fully probabilistic (FACET) approach  
*P.K.T. Oldring, L. Castle, C. O'Mahony and J. Dixon* 466
- Safety evaluation of mechanical recycling processes used to produce polyethylene terephthalate (PET) intended for food contact applications  
*E. Barthélémy, D. Spyropoulos, M.-R. Milana, K. Pfaff, N. Gontard, E. Lampi and L. Castle* 490
- Correlation of foodstuffs with ethanol–water mixtures with regard to the solubility of migrants from food contact materials  
*A. Seiler, A. Bach, M. Driffield, P. Paseiro Losada, P. Mercea, V. Tosa and R. Franz* 498
- Multi-analyte methods for the detection of photoinitiators and amine synergists in food contact materials and foodstuffs – Part I: HPLC-DAD screening of materials  
*T. Jung, C. Browatzki and T.J. Simat* 512
- Development of a rapid screening method to determine primary aromatic amines in kitchen utensils using direct analysis in real time mass spectrometry (DART-MS)  
*R. Paseiro-Cerrato, G.O. Noonan and T.H. Begley* 537
- Optimisation of an analytical method and results from the inter-laboratory comparison of the migration of regulated substances from food packaging into the new mandatory European Union simulant for dry foodstuffs  
*N. Jakubowska, G. Beldi, A. Psychès Bach and C. Simoneau* 546
- Analytical screening studies on irradiated food packaging  
*M. Driffield, E.L. Bradley, I. Leon, L. Lister, D.R. Speck, L. Castle and E.L.J. Potter* 556
