

Contents

Sesamin and sesamol as unexpected contaminants in various cold-pressed plant oils: NP-HPLC/FLD/DAD and RP-UPLC-ESI/MS ⁿ study <i>P. Górnas, A. Siger, I. Pugajeva and D. Segliņa</i>	567
Potential intakes of total polyols based on UK usage survey data <i>D.R. Tennant</i>	574
Contribution of citrulline to the formation of ethyl carbamate during Chinese rice wine production <i>P. Wang, J. Sun, X. Li, D. Wu, T. Li, J. Lu, J. Chen and G. Xie</i>	587
Acrylamide, 5-hydroxymethylfurfural and N ^ε -carboxymethyl-lysine in coffee substitutes and instant coffees <i>G. Loãc, P. Jacolot, C. Helou, C. Niquet-Léridon and F.J. Tessier</i>	593
Investigation of the presence of prednisolone in bovine urine <i>E. de Rijke, P.W. Zoontjes, D. Samson, S. Oostra, S.S. Sterk and L.A. van Ginkel</i>	605
Sex steroid levels in urine of cattle of different ages: evaluation of abuse control procedures <i>T. Snoj, J. Dolenc and S. Kobal</i>	614
Reported prevalence and quantitative LC-MS methods for the analysis of veterinary drug residues in honey: a review <i>R. Venable, C. Haynes and J.M. Cook</i>	621
Identification of a potential gene expression biomarker signature in bovine liver to detect the abuse of growth promoters <i>I. Riedmaier, M. Spornraft and M.W. Pfaffl</i>	641
Total and inorganic arsenic in foods of the first Hong Kong total diet study <i>S.W.-c. Chung, C.-h. Lam and B.T.-p. Chan</i>	650
Improvement of a sample preparation procedure for multi-elemental determination in Brazil nuts by ICP-OES <i>M. Welna and A. Szymczycha-Madeja</i>	658
Transfer of difenoconazole and azoxystrobin residues from chrysanthemum flower tea to its infusion <i>J. Xue, H. Li, F. Liu, J. Xue, X. Chen and J. Zhan</i>	666
Comparison of QuEChERS official methodologies for the analysis of pesticide residues on Colombian fruit by GC-MS <i>J.C. España Amórtégui and J.A. Guerrero Dallos</i>	676
Dioxin and dl-PCB exposure from food: the German LExUKon project <i>M.A. Schwarz, O. Lindtner, K. Blume, G. Heinemeyer and K. Schneider</i>	688
Determination of polycyclic aromatic hydrocarbons in Italian milk by HPLC with fluorescence detection <i>A.M. Girelli, D. Sperati and A.M. Tarola</i>	703
Contamination of food samples from Malaysia with polychlorinated dibenzo- <i>p</i> -dioxins and dibenzofurans and estimation of human intake <i>Y.-H. Leong, P.-N. Chiang, H.J. Jaafar, C.-Y. Gan and M.I.A. Majid</i>	711
Influence of body weight of mice on the susceptibility to okadaic acid, a diarrhetic shellfish poisoning toxin <i>H. Suzuki</i>	719
Updated evaluation of the migration of styrene monomer and oligomers from polystyrene food contact materials to foods and food simulants <i>S. Genualdi, P. Nyman and T. Begley</i>	723
Study of silver ion migration from melt-blended and layered-deposited silver polyethylene nanocomposite into food simulants and apple juice <i>M. Jokar and R.A. Rahman</i>	734
Multi-analyte methods for the detection of photoinitiators and amine synergists in food contact materials and foodstuffs – Part II: UHPLC-MS/MS analysis of materials and dry foods <i>T. Jung and T.J. Simat</i>	743
Evaluation of the migration of 15 photo-initiators from cardboard packaging into Tenax [®] using ultra-performance liquid chromatography-tandem mass spectrometry (UPLC-MS/MS) <i>K. Van Den Houwe, S. van de Velde, C. Evrard, E. Van Hoeck, J. Van Loco and F. Bolle</i>	767
