

Canadian Journal of Plant Science

August 2014 Volume 94, Number 6

Preface

Donald Smith, Xiaomin Zhou p.995-1008

Identification of regulatory genes to improve nitrogen use efficiency

David R. Guevara, Yong-Mei Bi, Steven J. Rothstein p.1009-1012

A novel nitrous oxide mitigation strategy: expressing nitrous oxide reductase from *Pseudomonas stutzeri* in transgenic plants

Shen Wan, Trevor Greenham, Kagami Goto, Yaseen Mottiar, Amanda M. Johnson, Julianne M. Staebler, Mohsin A. Zaidi, Qingyao Shu, Illimar Altosaar p.1013-1023

Manipulation of rhizosphere organisms to enhance glomalin production and C sequestration: Pitfalls and promises

F. L. Walley, A. W. Gillespie, Adekunbi B. Adetona, J. J. Germida, R. E. Farrell p.1025-1032

Identification of regulatory genes to reduce N₂O production

Steven D. Siciliano p.1033-1036

Nitrogen fixation, hydrogen production and N₂O emissions

Bryan Flynn, Amanda Graham, Neal Scott, David B. Layzell, Zhongmin Dong p.1037-1041

Manipulating lignin deposition

Mathias Schuetz, Carl Douglas, Lacey Samuels, Brian Ellis p.1043-1049

Microbial signaling and plant growth promotion

Fazli Mabood, Xiaomin Zhou, Donald L. Smith p.1051-1063

Transforming plant carbon into soil carbon: Process-level controls on carbon sequestration

Joann K. Whalen, Shamim Gul, Vincent Poirier, Sandra F. Yanni, Myrna J. Simpson, Joyce S. Clemente, Xiaojuan Feng, Sue J. Grayston, Jason Barker, Ed G. Gregorich, Denis A. Angers, Philippe Rochette, H. Henry Janzen p.1065-1073

Enhancing biomass production and yield by maintaining enhanced capacity for CO₂ uptake in response to elevated CO₂

Keshav Dahal, Sarathi M. Weraduwege, Khalil Kane, Shezad A. Rauf, Evangelos D. Leonardos, Winona Gadapati, Leonid Savitch, Jas Singh, Elizabeth-France Marillia, David C. Taylor, Malgre C. Micallef, Vicki Knowles, William Plaxton, John Barron, Fathey Sarhan, Norman Hüner, Bernard Grodzinski, Barry J. Micallef . . . p.1075-1083

- Potassium and nitrogen poisoning: Physiological changes and biomass gains in rice and barley**
D. T. Britto, K. D. Balkos, A. Becker, D. Coskun, W. Q. Huynh, H. J. Kronzucker p.1085-1089
- Plant respiration in a high CO₂ world: How will alternative oxidase respond to future atmospheric and climatic conditions?**
Jia Wang, Melissa Cheung, Lara Rasooli, Sasan Amirsadeghi, Greg C. Vanlerberghe p.1091-1101
- Identification of *Brassica* genotypes and molecular markers for increased seed oil content**
Nasir Javed, Muhammad Tahir, Jianfeng Geng, Genyi Li, Peter B. E. McVetty p.1103-1108
- Investigation of the contribution of oil biosynthetic enzymes to seed oil content in *Brassica napus* and *Arabidopsis thaliana***
Vesna Katavic, Lin Shi, Yuanyuan Yu, Lifang Zhao, George W. Haughn, Ljerka Kunst p.1109-1112
- The bilateral influence of plant and rhizosphere characteristics in brassicas varying in seed oil productivity**
J. K. Vessey, H. Fei, D. L. Burton, R. L. Bradley, D. L. Smith p.1113-1116
