## Research Articles

- 5379 *Stefano Manzoni, Giulia Vico, Gabriel Katul, Sari Palmroth, and Amilcare Porporato*  
**Optimal plant water-use strategies under stochastic rainfall** (doi 10.1002/2014WR015375)
- 5395 *J. A. Biederman, A. A. Harpold, D. J. Gochis, B. E. Ewers, D. E. Reed, S. A. Papuga, and P. D. Brooks*  
**Increased evaporation following widespread tree mortality limits streamflow response**  
(doi 10.1002/2013WR014994)
- 5410 *J. Lee and P. K. Kitanidis*  
**Large-scale hydraulic tomography and joint inversion of head and tracer data using the Principal Component Geostatistical Approach (PCGA)** (doi 10.1002/2014WR015483)
- 5428 *P. K. Kitanidis and J. Lee*  
**Principal Component Geostatistical Approach for large-dimensional inverse problems**  
(doi 10.1002/2013WR014630)
- 5444 *Ian Pattison, Stuart N. Lane, Richard J. Hardy, and Sim M. Reaney*  
**The role of tributary relative timing and sequencing in controlling large floods**  
(doi 10.1002/2013WR014067)
- 5459 *Emmanuel Léger, Albane Saintenoy, and Yves Coquet*  
**Hydrodynamic parameters of a sandy soil determined by ground-penetrating radar inside a single ring infiltrometer** (doi 10.1002/2013WR014226)
- 5475 *Kenneth Friedman, James P. Heaney, Miguel Morales, and John Palenchar*  
**Analytical optimization of demand management strategies across all urban water use sectors**  
(doi 10.1002/2013WR014261)
- 5492 *Rui A. P. Perdigão and Günter Blöschl*  
**Spatiotemporal flood sensitivity to annual precipitation: Evidence for landscape-climate coevolution**  
(doi 10.1002/2014WR015365)
- 5510 *Marc F. Müller, David N. Dralle, and Sally E. Thompson*  
**Analytical model for flow duration curves in seasonally dry climates** (doi 10.1002/2014WR015301)
- 5532 *E. Lotsari, M. Vaaja, C. Flener, H. Kaartinen, A. Kukko, E. Kasvi, H. Hyyppä, J. Hyyppä, and P. Alho*  
**Annual bank and point bar morphodynamics of a meandering river determined by high-accuracy multitemporal laser scanning and flow data** (doi 10.1002/2013WR014106)
- 5560 *L. Brocca, G. Zucco, H. Mittelbach, T. Moramarco, and S. I. Seneviratne*  
**Absolute versus temporal anomaly and percent of saturation soil moisture spatial variability for six networks worldwide** (doi 10.1002/2014WR015684)
- 5577 *L. A. Melsen, A. J. Teuling, S. W. van Berkum, P. J. J. F. Torfs, and R. Uijlenhoet*  
**Catchments as simple dynamical systems: A case study on methods and data requirements for parameter identification** (doi 10.1002/2013WR014720)
- 5597 *Haixing Liu, Dragan Savić, Zoran Kapelan, Ming Zhao, Yixing Yuan, and Hongbin Zhao*  
**A diameter-sensitive flow entropy method for reliability consideration in water distribution system design** (doi 10.1002/2013WR014882)
- 5611 *Ernesto Trujillo and Noah P. Molotch*  
**Snowpack regimes of the Western United States** (doi 10.1002/2013WR014753)
- 5624 *Flavio Finger, Allyn Knox, Enrico Bertuzzo, Lorenzo Mari, Didier Bompangue, Marino Gatto, Ignacio Rodriguez-Iturbe, and Andrea Rinaldo*  
**Cholera in the Lake Kivu region (DRC): Integrating remote sensing and spatially explicit epidemiological modeling\*** (doi 10.1002/2014WR015521)

\*This article is part of a Special Section—Hydroepidemiology: A pathway to link hydrology and climate with human health

- 5638 *Wouter R. Berghuijs, Murugesu Sivapalan, Ross A. Woods, and Hubert H. G. Savenije*  
**Patterns of similarity of seasonal water balances: A window into streamflow variability over a range of time scales** (doi 10.1002/2014WR015692)
- 5662 *Alex K. Manda and Wendy A. Klein*  
**Rescuing degrading aquifers in the Central Coastal Plain of North Carolina (USA): Just process, effective groundwater management policy, and sustainable aquifers** (doi 10.1002/2013WR015242)
- 5678 *Ravid Rosenzweig, Alex Furman, Carlos Dosoretz, and Uri Shavit*  
**Modeling biofilm dynamics and hydraulic properties in variably saturated soils using a channel network model** (doi 10.1002/2013WR015211)
- 5698 *Petra Döll, Hannes Müller Schmied, Carina Schuh, Felix T. Portmann, and Annette Eicker*  
**Global-scale assessment of groundwater depletion and related groundwater abstractions: Combining hydrological modeling with information from well observations and GRACE satellites** (doi 10.1002/2014WR015595)
- 5721 *Lee Slater, Warren Barrash, Jeanette Montrey, and Andrew Binley*  
**Electrical-hydraulic relationships observed for unconsolidated sediments in the presence of a cobble framework** (doi 10.1002/2013WR014631)
- 5743 *H. Yizhaq, S. Sela, T. Svoray, S. Assouline, and G. Bel*  
**Effects of heterogeneous soil-water diffusivity on vegetation pattern formation\*** (doi 10.1002/2014WR015362)
- \*This article is part of a Special Section—Eco-hydrology of Semiarid Environments: Confronting Mathematical Models with Ecosystem Complexity**
- 5759 *Vladimir Cvetkovic, Aldo Fiori, and Gedeon Dagan*  
**Solute transport in aquifers of arbitrary variability: A time-domain random walk formulation** (doi 10.1002/2014WR015449)
- 5774 *Yi Mei, George M. Hornberger, Louis A. Kaplan, J. Denis Newbold, and Anthony K. Aufdenkampe*  
**The delivery of dissolved organic carbon from a forested hillslope to a headwater stream in southeastern Pennsylvania, USA** (doi 10.1002/2014WR015635)
- 5797 *Vladimir Cvetkovic and Hrvoje Gotovac*  
**On the upscaling of chemical transport in fractured rock** (doi 10.1002/2014WR015505)
- 5817 *Lipeng Ning, Francesca P. Carli, Ardeshir Mohammad Ebtehaj, Efi Foufoula-Georgiou, and Tryphon T. Georgiou*  
**Coping with model error in variational data assimilation using optimal mass transport** (doi 10.1002/2013WR014966)
- 5831 *Ashwin Venkatraman, Marc A. Hesse, Larry W. Lake, and Russell T. Johns*  
**Analytical solutions for flow in porous media with multicomponent cation exchange reactions** (doi 10.1002/2013WR015091)
- 5848 *Bin Wu, Yi Zheng, Yong Tian, Xin Wu, Yingying Yao, Feng Han, Jie Liu, and Chunmiao Zheng*  
**Systematic assessment of the uncertainty in integrated surface water-groundwater modeling based on the probabilistic collocation method** (doi 10.1002/2014WR015366)
- 5866 *Elham Rouholahnejad, Karim C. Abbaspour, Raghvan Srinivasan, Victor Bacu, and Anthony Lehmann*  
**Water resources of the Black Sea Basin at high spatial and temporal resolution** (doi 10.1002/2013WR014132)
- 5886 *J. E. Chambers, P. B. Wilkinson, S. Uhlemann, J. P. R. Sorensen, C. Roberts, A. J. Newell, W. O. C. Ward, A. Binley, P. J. Williams, D. C. Gooddy, G. Old, and L. Bai*  
**Derivation of lowland riparian wetland deposit architecture using geophysical image analysis and interface detection** (doi 10.1002/2014WR015643)
- 5906 *Tero J. Niemi, Teemu Kokkonen, and Alan W. Seed*  
**A simple and effective method for quantifying spatial anisotropy of time series of precipitation fields** (doi 10.1002/2013WR015190)
- 5926 *Jérôme Weiss, Pietro Bernardara, and Michel Benoit*  
**Modeling intersite dependence for regional frequency analysis of extreme marine events** (doi 10.1002/2014WR015391)
- 5941 *D. P. Viero, P. Peruzzo, L. Carniello, and A. Defina*  
**Integrated mathematical modeling of hydrological and hydrodynamic response to rainfall events in rural lowland catchments** (doi 10.1002/2013WR014293)

- 5958 *Chao Li and Vijay P. Singh*  
**A multimodel regression-sampling algorithm for generating rich monthly streamflow scenarios**  
 (doi 10.1002/2013WR013969)
- 5980 *Koen Siteur, Maarten B. Eppinga, Derek Karssenbergh, Mara Baudena, Marc F.P. Bierkens, and Max Rietkerk*  
**How will increases in rainfall intensity affect semiarid ecosystems?\*** (doi 10.1002/2013WR014955)  
**\*This article is part of a Special Section—Eco-hydrology of Semiarid Environments: Confronting Mathematical Models with Ecosystem Complexity**
- 6002 *Lassina Coulibaly, Paul M. Jakus, and John E. Keith*  
**Modeling water demand when households have multiple sources of water** (doi 10.1002/2013WR015090)
- 6015 *Steven E. Yochum, Brian P. Bledsoe, Ellen Wohl, and Gabrielle C. L. David*  
**Spatial characterization of roughness elements in high-gradient channels of the Fraser Experimental Forest, Colorado, USA** (doi 10.1002/2014WR015587)
- 6030 *Pablo A. Mendoza, Balaji Rajagopalan, Martyn P. Clark, Gonzalo Cortés, and James McPhee*  
**A robust multimodel framework for ensemble seasonal hydroclimatic forecasts**  
 (doi 10.1002/2014WR015426)
- 6053 *Jun Yin, Amilcare Porporato, and John Albertson*  
**Interplay of climate seasonality and soil moisture-rainfall feedback** (doi 10.1002/2013WR014772)
- 6067 *M. Rinderer, H. J. van Meerveld, and J. Seibert*  
**Topographic controls on shallow groundwater levels in a steep, prealpine catchment: When are the TWI assumptions valid?** (doi 10.1002/2013WR015009)
- 6081 *Xujun Han, Harrie-Jan Hendricks Franssen, Carsten Montzka, and Harry Vereecken*  
**Soil moisture and soil properties estimation in the Community Land Model with synthetic brightness temperature observations\*** (doi 10.1002/2013WR014586)  
**\*This article is part of a Special Section—Patterns in Soil-Vegetation-Atmosphere Systems: Monitoring, Modelling and Data Assimilation**
- 6106 *Adam J. Bechle and Chin H. Wu*  
**An entropy-based surface velocity method for estuarine discharge measurement**  
 (doi 10.1002/2014WR015353)
- 6129 *M. R. Deinert*  
**Scale-dependent energy conservation and its connection to flow field instability in porous media**  
 (doi 10.1002/2013WR015168)
- 6135 *Richard Arsenault and François P. Brissette*  
**Continuous streamflow prediction in ungauged basins: The effects of equifinality and parameter set selection on uncertainty in regionalization approaches** (doi 10.1002/2013WR014898)
- 6154 *Hailong Wang, Huade Guan, Zijuan Deng, and Craig T. Simmons*  
**Optimization of canopy conductance models from concurrent measurements of sap flow and stem water potential on Drooping Sheoak in South Australia\*** (doi 10.1002/2013WR014818)  
**\*This article is part of a Special Section—Patterns in Soil-Vegetation-Atmosphere Systems: Monitoring, Modelling and Data Assimilation**
- 6168 *David L. Azinheira, Durelle T. Scott, W. Hession, and Erich T. Hester*  
**Comparison of effects of inset floodplains and hyporheic exchange induced by in-stream structures on solute retention** (doi 10.1002/2013WR014400)
- 6191 *Christopher T. Green, Yong Zhang, Bryant C. Jurgens, J. Jeffrey Starn, and Matthew K. Landon*  
**Accuracy of travel time distribution (TTD) models as affected by TTD complexity, observation errors, and model and tracer selection** (doi 10.1002/2014WR015625)
- 6214 *Yohei Sawada, Toshio Koike, and Patricia Ann Jaranilla-Sanchez*  
**Modeling hydrologic and ecologic responses using a new eco-hydrological model for identification of droughts** (doi 10.1002/2013WR014847)
- 6236 *Zuansi Cai and Ulrich Ofterdinger*  
**Numerical assessment of potential impacts of hydraulically fractured Bowland Shale on overlying aquifers** (doi 10.1002/2013WR014943)
