

Journal of Arid Environments

Volume 112 Part A January 2015

Special Issue on the Fourth Drylands Deserts and Desertification “DDD” Conference
Guest Editors: Alon Tal, Sharon B. Megdal, Arnon Karnieli, Samara Bel

Contents

INTRODUCTION

Gnacadjia, L. New challenges in science and policies to Combat Desertification 1

PART ONE: EVALUATION OF ZERO NET LAND DEGRADATION AND LAND DEGRADATION NEUTRALITY AS A GLOBAL STRATEGY TO COMBAT DESERTIFICATION

Chasek, P., Safriel, U., Shikongo, S. & Fuhrman, V.F. Operationalizing Zero Net Land Degradation: The next stage in international efforts to combat desertification? 5

Grainger, A. Is Land Degradation Neutrality feasible in dry areas? 14

Tal, A. The implications of environmental trading mechanisms on a future Zero Net Land Degradation protocol. 25

Nkonya, E. & Anderson, W. Exploiting provisions of land economic productivity without degrading its natural capital. 33

Stavi, I. & Lal, R. Achieving Zero Net Land Degradation: Challenges and opportunities 44

PART TWO: DEVELOPMENTS IN THE APPLICATION OF REMOTE SENSING TO MONITOR LAND DEGRADATION

Grinblat, Y., Kidron, G.J., Karnieli, A. & Benenson, I. Simulating land-use degradation in West Africa with the ALADYN model 52

Sela, S., Svoray, T. & Assouline, S. Temporal variability of soil water content in a semiarid hillslope across time scales: Effect of soil surface condition 64

Rozenstein, O. & Karnieli, A. Identification and characterization of Biological Soil Crusts in a sand dune desert environment across Israel–Egypt border using LWIR emittance spectroscopy 75

PART THREE: SUSTAINABLE SURFACE WATER MANAGEMENT IN DRYLANDS

Thevs, N., Peng, H., Rozi, A., Zerbe, S. & Abdusalih, N. Water allocation and water consumption of irrigated agriculture and natural vegetation in the Aksu-Tarim river basin, Xinjiang, China 87

Iacobellis, V., Castorani, A., Di Santo, A.R. & Gioia, A. Rationale for flood prediction in karst endorheic areas 98

Chen, A., Abramson, A., Becker, N. & Megdal, S.B. A tale of two rivers: Pathways for improving water management in the Jordan and Colorado River basins 109
