Review Article

- Chemistry of copper in white wine: a review _____ 339
A.C. Clark, E.N. Wilkes and G.R. Scollary

Original Articles

- Consumer-assisted selection: the preference for new tablegrape cultivars in China _____ 351
J. Zhou, L. Cao, S. Chen, A. Perl and H. Ma
- Importance, use and awareness of South Australian geographical indications _____ 361
N.R. Verdonk, K.L. Wilkinson and J. Bruwer
- Wine matrix composition affects temporal aroma release as measured by proton transfer reaction – time-of-flight – mass spectrometry _____ 367
C. Muñoz-González, E. Sémon, P.J. Martín-Álvarez, E. Guichard, M.V. Moreno-Arribas, G. Feron and M.Á. Pozo-Bayón
- Aroma composition of 2-year-old New Zealand Pinot Noir wine and its relationship to sensory characteristics using canonical correlation analysis and addition/omission tests _____ 376
E. Tomasino, R. Harrison, J. Breitmeyer, R. Sedcole, R. Sherlock and A. Frost
- Monitoring of glutathione concentration during winemaking by a reliable high-performance liquid chromatography analytical method _____ 389
D. Fracassetti and A. Tirelli
- Effect of ageing of sweet Sherry wines obtained from cvs Muscat and Pedro Ximénez on ethyl carbamate concentration _____ 396
M.J. Ruiz-Bejarano, R. Castro-Mejías, M.C. Rodríguez-Dodero and C. García-Barroso
- Yeast-induced changes in the concentration and structure of oligomeric proanthocyanidins during simulated wine fermentation _____ 404
J.-Y. Li, H.-W. Zhao and W.-D. Huang
- Evolution of S-cysteinylated and S-glutathionylated thiol precursors during grape ripening of *Vitis vinifera* L. cvs Grechetto, Malvasia del Lazio and Sauvignon Blanc _____ 411
M. Cerreti, M. Esti, I. Benucci, K. Liburdi, C. de Simone and P. Ferranti
- Influence of ultraviolet exclusion and of powdery mildew infection on Sauvignon Blanc grape composition and on extraction of pathogenesis-related proteins into juice _____ 417
B. Tian, R. Harrison, M. Jaspers and J. Morton
- Changes in the volatile composition of wine from grapes treated with Bordeaux mixture: a laboratory-scale study _____ 425
V. Martins, A. Teixeira and H. Gerós
- Electrical impedance of Shiraz berries correlates with decreasing cell vitality during ripening _____ 430
L. Caravia, C. Collins and S.D. Tyerman
- Pre-flowering leaf removal alters grape microbial population and offers good potential for a more sustainable and cost-effective management of a Pinot Noir vineyard _____ 439
M. Sternad Lemut, P. Sivilotti, L. Butinar, J. Laganis and U. Vrhovsek
- Development and feeding effect of frosted scale *Parthenolecanium prunosum* Cocquillet (Hemiptera: Coccidae) on selected *Vitis vinifera* L. cultivars _____ 451
N.A. Simbiken, P.D. Cooper and K.S. Powell
- Hierarchical genetic variation of Botryosphaeriaceae species associated with decline and dieback of grapevine in south-eastern Australia _____ 458
Y. Qiu, C.C. Steel, G.J. Ash and S. Savocchia
- Impact of deficit irrigation strategies in a saline environment on Shiraz yield, physiology, water use and tissue ion concentration _____ 468
K.A. DeGaris, R.R. Walker, B.R. Loveys and S.D. Tyerman
- Spring root-zone temperature regulates root growth, nutrient uptake and shoot growth dynamics in grapevines _____ 479
S.J. Clarke, K.J. Lamont, H.Y. Pan, L.A. Barry, A. Hall and S.Y. Rogiers
- Abiotic stress improves in vitro biological indexing of *Grapevine leafroll-associated virus-3* in red grapevine cultivars _____ 490
Z.-H. Cui, W.-L. Bi, C. Pan, Y. Xu and Q.-C. Wang
- Quantitative trait loci for the response to gibberellic acid of berry size and seed mass in tablegrape (*Vitis vinifera* L.) _____ 496
J. Correa, G. Ravest, D. Laborie, M. Mamani, E. Torres, C. Muñoz, M. Pinto and P. Hinrichsen
- Seed morpho-colorimetric analysis by computer vision: a helpful tool to identify grapevine (*Vitis vinifera* L.) cultivars _____ 508
M. Orrù, O. Grillo, G. Venora and G. Bacchetta
