

Quality of honeybee drones reared in colonies with limited and unlimited access to pollen K. CZEKOŃSKA, B. CHUDA-MICKIEWICZ, J. SAMBORSKI(Poland)	1
Application of continuous monitoring of honeybee colonies W.G. MEIKLE, N. HOLST (USA, Denmark)	10
Morphology of mandibular and intramandibular glands in workers and virgin queens of <i>Melipona scutellaris</i> D.E. SANTOS, E.A. DE SOUZA, C.U. VIEIRA, J.C. ZANUNCIO, J.E. SERRÃO (Brazil)	23
Differentially expressed microRNAs between queen and worker larvae of the honey bee (<i>Apis mellifera</i>) Y.-Y. SHI, H.-J. ZHENG, Q.-Z. PAN, Z.-L. WANG, Z.-J. ZENG (China).....	35
A scientific note on the prevalence of the cordovan phenotype in the African-derived honey bee population in the Southeastern United States A.N. MORTENSEN, J.D. ELLIS (USA)	46
Wing geometric morphometrics and microsatellite analysis provide similar discrimination of honey bee subspecies A. OLEKSA, A. TOFILSKI (Poland).....	49
Honey bee foraging distance depends on month and forage type M.J. COUVILLON, F.C. RIDDELL PEARCE, C. ACCLETON, K.A. FENSOME, S.K.L. QUAH, E.L. TAYLOR, F.L.W. RATNIEKS (UK).....	61
Orchid bee (Hymenoptera: Apidae: Euglossini) assemblages from three different threatened phytophysiognomies of the subtropical Brazilian Atlantic Forest D.C. GIANGARELLI, W.M. DE AGUIAR, S.H. SOFIA (Brazil)	71
Perfume production in flowers of <i>Angelonia salicariifolia</i> attracts males of <i>Euglossa annectans</i> which do not promote pollination S. BOFF, D. DEMARCO, P. MARCHI, I. ALVES-DOS-SANTOS (Brazil, Germany).....	84
Pollen and nectar quality drive the major and minor floral choices of bumble bees L. SOMME, M. VANDERPLANCK, D. MICHEZ, I. LOMBAERDE, R. MOERMAN, B. WATHELET, R. WATTIEZ, G. LOGNAY, A.-L. JACQUEMART (Belgium).....	92
Pesticide-induced oxidative stress in laboratory and field populations of native honey bees along intensive agricultural landscapes in two Eastern Indian states P. CHAKRABARTI, S. RANA, S. SARKAR, B. SMITH, P. BASU (India, UK)	107
A scientific note about a parasitoid that can parasitize the yellow-legged hornet, <i>Vespa velutina nigrithorax</i> , in Europe E. DARROUZET, J. GÉVAR, S. DUPONT (France)	130
