## Research Articles

Female figs as traps: Their impact on the dynamics of an experimental fig tree-pollinator-parasitoid community <i>N. Suleman, S. Sait and S.G. Compton</i> . . . . .	1
Community and species-level responses of phyllostomid bats to a disturbance gradient in the tropical Andes <i>F. Montaña-Centellas, M.I. Moya, L.F. Aguirre, R. Galeón, O. Palabral, R. Hurtado, I. Galarza and J. Tordoya</i> . . .	10
Ghost crab populations respond to changing morphodynamic and habitat properties on sandy beaches <i>S. Lucrezi</i> . . . . .	18
Weak trophic links between a crab-spider and the effective pollinators of a rewardless orchid <i>C. Quintero, J.C. Corley and M.A. Aizen</i> . . . . .	32
Occurrence patterns of facilitation by shade along a water gradient are mediated by species traits <i>C. Egawa and S. Tsuyuzaki</i> . . . . .	45
Road network in an agrarian landscape: Potential habitat, corridor or barrier for small mammals? <i>L. Redon (de), I. Le Viol, F. Jiguet, N. Machon, O. Scher and C. Kerbiriou</i> . . . . .	58

## Short Communication

Electricity pylons may be potential foci for the invasion of black cherry <i>Prunus serotina</i> in intensive farmland <i>P. Kurek, T.H. Sparks and P. Tryjanowski</i> . . . . .	40
Patch size has no effect on insect visitation rate per unit area in garden-scale flower patches <i>M. Garbuzov, A. Madsen and F.L.W. Ratnieks</i> . . . . .	53
