

Volume 80 Issue 1
February 2015

Consumer responses to fruit quality of 'Jonagold' apples treated with postharvest application of 1-methylcyclopropene (1-MCP) under air and controlled atmosphere storage conditions

J.N. Wünsche · C.S. Heyn

> 3

Post-harvest retention of apple fruit firmness by 1-methylcyclopropene (1-MCP) treatment or dynamic CA storage with chlorophyll fluorescence (DCA-CF)

A. Zanella · O. Rossi

> 11

Fruit quality as affected by 1-MCP treatment and DCA storage – a comparison of the two methods

S. Gabioud Rebeaud · F. Gasser

> 18

1-Methylcyclopropene (1-MCP) and dynamic controlled atmosphere (DCA) applications under elevated storage temperatures: Effects on fruit quality of 'Elstar', 'Jonagold' and 'Gloster' apple (*Malus domestica* Borkh.)

D. Köpcke

> 25

Effect of high temperature and 1-MCP application or dynamic controlled atmosphere on energy savings during apple storage

D. Kitemann · R. McCormick · D.A. Neuwald

> 33

The effects of drought stress on leaf gene expression during flowering in blackcurrant (*Ribes nigrum* L.)

N. Čereković · D. Jarret · M. Pagter · D.W. Cullen · J.M. Morris · P.E. Hedley
R. Brennan · K.K. Petersen
