

Volume 80 Issue 2
April 2015

Plant developmental consequences of lighting from above or below
in the production of Poinsettia

K.-J. Bergstrand H. Asp E.H. Larsson Jönsson H.K. Schüssler

› 51

Red light promotes compact growth of sunflowers

T. Schwend D. Prucker H. Mempel

› 56

Nutrient concentrations and root substrate formulations influence the performance
of seedling grafts of tomato

J.M. Choi C.W. Lee J.S. Park

› 62

Assessment of germination rate of the tomato seeds using image processing
and machine learning

U. Škrubej Č. Rozman D. Stajnko

› 68

Antioxidant compounds and activity in cucumber fruit in response
to foliar and soil humic acid application

Y. Karakurt H. Ozdamar-Unlu H. Unlu M. Tonguc

› 76

Growth and water use efficiency of potted *Murraya paniculata* as affected
by irrigation system and container size

G. Fascella Y. Rouphael

› 81

Effect of paclobutrazol in potted plants of four cultivars
of *Dianthus barbatus* × *chinensis*

A. Lenzi M. Nannicini P. Mazzeo A. Baldi

› 87
