

CONTENTS

AGRICULTURAL ECONOMICS

- Application of Adaptive Neuro-Fuzzy Inference System (ANFIS) in Forecasting Agricultural Products Export Revenues (Case of Iran's Agriculture Sector).
S. A. Mohaddes, and S. M. Fahimifard 1
- Control System of Management for Intensive Cultivation Activity in Tomato Production: Spanish Case.
J. De Pablo Valenciano, and J. Uribe Toril 11

AGRICULTURAL ENTOMOLOGY

- Antibiotic Resistance of Canola Cultivars Affecting Demography of *Spodoptera exigua* (Lepidoptera: Noctuidae).
M. Goodarzi, Y. Fathipour, and A. A. Talebi 23
- Demographic Parameters of *Lipaphis erysimi* on Canola Cultivars under Different Nitrogen Fertilization Regimes.
F. Fallahpour, R. Ghorbani, M. Nassiri Mahallati, and M. Hosseini 35

AGRICULTURAL MACHINERY

- A Comparative Study Between Artificial Neural Networks and Adaptive Neuro-Fuzzy Inference Systems for Modeling Energy Consumption in Greenhouse Tomato Production: A Case Study in Isfahan Province.
B. Khoshnevisan, S. Rafiee, J. Iqbal, Sh. Shamshirband, M. Omid, N. Badrul Anuar, and A. W. Abdul Wahab 49

AGRONOMY

- Deteriorative Effects of Cadmium Stress on Antioxidant System and Cellular Structure in Germinating Seeds of *Brassica napus* L.
B. Ali, X. Deng, X. Hu, R. A. Gill, S. Ali, S. Wang, and W. Zhou 63
- Improving Photosynthetic Performance of Bread Wheat under Field Drought Stress by Foliar Applied Glycine Betaine.
N. Gupta, and S. K. Thind 75

FOOD SCIENCE

- Application of Repetitive Extragenic Palindromic Elements Based on PCR in Detection of Genetic Relationship of Lactic Acid Bacteria Species Isolated from Traditional Fermented Food Products.
F. Tafvizi, and M. Tajabadi Ebrahimi 87
- Effects of Commercial Oat Fiber on Characteristics of Batter and Sponge Cake.
M. Majzoobi, M. Habibi, S. Hedayati, F. Ghiasi, and A. Farahnaky 99
- Evaluation of Genetic Diversity among South Tunisian Pomegranate (*Punica granatum* L.) Accessions Using Fruit Traits and RAPD Markers.
E. Mansour, A. Ben Khaled, T. Triki, M. Abid, K. Bachar, and A. Ferchichi 109
- Improving Textural and Sensory Characteristics of Low-fat UF Feta Cheese Made with Fat Replacers.
H. Rashidi, M. Mazaheri-Tehrani, S. M. A. Razavi, and M. Ghods-Rohany 121

Continued on back cover

Continued from front cover:

FOOD SCIENCE

Modeling Rehydration Behavior of Dried Figs.

S. Ansari, N. Maftoon-Azad, E. Hosseini, A. Farahnaky, and Gh. Asadi

133

FORESTRY

Differences in Rainfall Interception during the Growing and Non-growing Seasons in a *Fraxinus rotundifolia* Mill. Plantation Located in a Semiarid Climate.

S. M. M. Sadeghi, P. Attarod, and T. G. Pypker

145

HORTICULTURAL SCIENCE

Effect of Light Quality Selective Plastic Films on Anthocyanin Biosynthesis in *Vitis vinifera* L. cv. Yatomi Rosa.

J. H. Cheng, L. Z. Wei, and J. Wu

157

Morpho-physiological Responses of Strawberry (*Fragaria xananassa*) to Exogenous Salicylic Acid Application under Drought Stress.

N. Ghaderi, S. Normohammadi, and T. Javadi

167

Study on Phosphorus Supply Management of Poinsettia Grown in Peat-Based Substrate.

A. Khandan-Mirkohi, M. K. Schenk, and M. Fereshtian

179

IRRIGATION AND DRAINAGE

Optimizing Pistachio Irrigation Management Using the Relationship between Echo-physiological Characteristics and Water Stress.

N. Sedaghati, and H. Hokmabadi

189

Virtual Water Flows Related to Grain Crop Trade and Their Influencing Factors in Hetao Irrigation District, China.

J. Liu, P. Wu, Y. Wang, X. Zhao, Sh. Sun, and X. Cao

201

PLANT BREEDING

Quantitative Trait Loci Associated with Isolate Specific and Isolate Non-Specific Partial Resistance to *Sclerotinia sclerotiorum* in Sunflower.

M. Amoozadeh, R. Darvishzadeh, R. Davar, B. Abdollahi Mandoulakani, P. Haddadi, and A. Basirmia

213

PLANT PATHOLOGY

Five Species of Tylenchidae and Dolichodoridae (Nematoda: Tylenchoidea) from Iran.

S. H. Mirbabaei Karani, L. Kashi, R. Ghaderi, and A. Karegar

227

Reaction of Iranian Cereal Genotypes to Multiple Strains of *Xanthomonas translucens* pv. *cerealis*.

N. Falahi Charkhabi, M. Shams-bakhsh, and H. Rahimian

241

SOIL SCIENCE

Effects of Crop Residue Management and Nitrogen Fertilizer on Soil Nitrogen and Carbon Content and Productivity of Wheat (*Triticum aestivum* L.) in Two Cropping Systems.

T. Pandiaraj, S. Selvaraj, and N. Ramu

249
