

| | |
|--|-----|
| Factors influencing soil aggregation and particulate organic matter responses to bioenergy crops across a topographic gradient T.A. Ontl, C.A. Cambardella, L.A. Schulte and R.K. Kolka | 1 |
| Decoding potential effects of climate and vegetation change on mineral weathering in alpine soils: An experimental study in the Wind River Range (Wyoming, USA) C. Mavris, G. Furrer, D. Dahms, S.P. Anderson, A. Blum, J. Goetze, A. Wells and M. Egli | 12 |
| Application of smoothed particle hydrodynamics (SPH) and pore morphologic model to predict saturated water conductivity from X-ray CT imaging in a silty loam Cambisol N. Dal Ferro, A.G. Strozzi, C. Duwig, P. Delmas, P. Charrier and F. Morari | 27 |
| Electrical signals generated by soil microorganisms in microbial fuel cells respond linearly to soil Cd ²⁺ pollution Y.-B. Jiang, H. Deng, D.-M. Sun and W.-H. Zhong | 35 |
| The role of organic matter in ameliorating acid sulfate soils with sulfuric horizons P.S. Michael, R. Fitzpatrick and R. Reid | 42 |
| Influence of parent material on the aluminium fractions in acidic soils under <i>Pinus pinaster</i> in Galicia (NW Spain) C. Eimil-Fraga, E. Álvarez-Rodríguez, R. Rodríguez-Soalleiro and M.J. Fernández-Sanjurjo | 50 |
| Pedogenesis in a Pleistocene fluvial system of the Northern Pantanal — Brazil A.F. Nascimento, S.A.C. Furquim, R.C. Graham, R.M. Beirigo, J.C. Oliveira Junior, E.G. Couto and P. Vidal-Torrado | 58 |
| Properties and genesis of Argialbolls in the USA J.G. Bockheim | 73 |
| Spectral libraries for quantitative analyses of tropical Brazilian soils: Comparing vis-NIR and mid-IR reflectance data F.S. Terra, J.A.M. Demattê and R.A. Viscarra Rossel | 81 |
| Spatial variation of soil magnetic susceptibility in relation to different emission sources in southern Poland T. Magiera, H. Parzentny, L. Róg, R. Chybiorz and M. Wawer | 94 |
| Drying effects on selenium and copper in 0.01 M calcium chloride soil extractions S. Supriatin, C.A. Terrones, W. Bussink and L. Weng | 104 |
