

CONTENTS**Special Issue:****Landforms and processes in arid and semi-arid environments****Edited by:****Xiaoping Yang and Martin Williams**

Landforms and processes in arid and semi-arid environments X. Yang and M. Williams	1
Interactions between fluvial and eolian geomorphic systems and processes: Examples from the Sahara and Australia M. Williams	4
Landform evolution in the arid northern United Arab Emirates: Impacts of tectonics, sea level changes and climate C.F. Pain and M.A. Abdelfattah	14
The Southern Westerlies in Central Chile during the two last glacial cycles as documented by coastal aeolian sand deposits and intercalating palaeosols H. Veit, F. Preusser and M. Trauerstein	30
Owens Lake dune fields: Composition, sources of sand, and transport pathways N. Lancaster, S. Baker, S. Bacon and G. McCarley-Holder	41
Contemporary aeolian morphogenesis in semiarid landscapes of the intermountain depressions of Southern Siberia O. Bazhenova and E. Tyumentseva	50
Pleistocene wind system in eastern Austria and its impact on landscape evolution K. Sebe, R. Roetzel, M. Fiebig and C. Lüthgens	59
The relationship between the spread of the Catholic Church and the shifting agro-pastoral line in the Chahar Region of northern China X. Zhang, T. Sun and J. Xu	75
Evaluating the potential of database technology for documenting environmental change in China's deserts L. Scuderi, G. Weissmann, P. Kindilien and X. Yang	87
